

KOVARA™

Moisture Barrier Products

floorunderlayment.gcpat.com

Same product. New name.

VERSASHIELD® will be sold as

KOVARA™ in early 2018.

Benefits for Flooring Contractors

- Install a moisture barrier in a fraction of the time
- Reduce labor costs with easy-to-install solution
- Gain the assurance of a 10-year product warranty

Benefits for Building Owners

- Gain proven moisture protection
- Minimize business disruption
- Improve comfort for workers and building occupants during construction

Save time and money protecting your floors

The KOVARA™ line of moisture barrier products mitigates moisture in a fraction of the time of alternative solutions. These easy-to-install membranes get you back in business quickly, accelerating project completion for contractors and reducing downtime for building owners. The KOVARA™ solution saves contractors money by eliminating the need for trained applicators typically required to install epoxy-based moisture barriers. There's minimal prep time, no cure time involved, and no need for a cementitious overlay. Simply fill concrete cracks, roll the flooring membrane on the concrete, and tape the seams.

Gain maximum protection from moisture risk

In the U.S. alone, moisture causes more than \$1 billion of damage per year to flooring. KOVARA™ flooring membranes alleviate this risk, safeguarding your project against high moisture conditions. KOVARA™ 95 membranes are engineered to perform at up to 95 percent relative humidity, and KOVARA™ MBX membranes perform at up to 99.5 percent relative humidity. These unique moisture barriers also protect floors from alkalinity emitted from concrete slabs, significantly reducing flooring defects.

Take the mess out of moisture mitigation

KOVARA™ floor underlayments alleviate many environmental concerns that often come with installing moisture barriers. The membranes emit no VOCs (per California Specification 01350), eliminating a potential source of noxious fumes. Also, installation of the membrane does not require shot blasting, which generates silica dust and debris at the job site. This further reduces costs since there's no need for HEPA vacuums or sealing of ventilation systems while the work is being done.

KOVARA™ MBX membrane & KOVARA™ MBX seam tape

Applications

Whether you're building new construction or remodeling, you can use KOVARA™ moisture barrier products to protect floor finishes, even in high-traffic environments such as hospitals and retail stores. Its triple-layer construction enables it to perform well below a wide range of flooring products, including:

- LVT and VCT
- Sheet vinyl
- Hardwood and bamboo
- Carpet tile
- Ceramic tile and stone
- Engineered wood and laminates

World-class support

KOVARA™ products are backed by a 10-year replacement warranty. KOVARA™ customers also benefit from GCP's technical service team, providing field support for successful job completion.
