

1. Identification

OPTIC 3101 CLEAR 5GP

# SAFETY DATA SHEET

Product identifier: OPTIC 3101 CLEAR 5GP

Other means of identification Synonyms:		icone Coating	
Recommended use and restrie	ctio	n on use	
<b>Recommended use:</b> Protection of construction materials <b>Restrictions on use:</b> For industrial use only.			
Manufacturer/Importer/Distr ibutor Information	:	Momentive Performance Materials LLC 260 Hudson River Road Waterford NY 12188	
Contact person	:	commercial.services@momentive.com	
Telephone	:	General information +1-800-295-2392	
Emergency telephone number			
Supplier	:	CHEMTREC 1-800-424-9300	

# 2. Hazard(s) identification

#### **Hazard Classification**

Physical Hazards Flammable liquids	Category 4
Health Hazards	
Toxic to reproduction	Category 2

## Unknown toxicity - Health

Acute toxicity, oral	0 %
Acute toxicity, dermal	0 %
Acute toxicity, inhalation, vapor	0 %
Acute toxicity, inhalation, dust or mist	0 %

# Label Elements

Hazard Symbol:

Signal Word:	Warning
Hazard Statement:	H227; Combustible liquid. H361; Suspected of damaging fertility or the unborn child.
Precautionary Statements	
Prevention:	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Wear protective gloves/protective clothing/eye protection/face protection. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required.
Response:	IF exposed or concerned: Get medical advice/attention. In case of fire, use sand, dry chemical or alcohol-resistant foam.
Storage:	Store in a well-ventilated place. Keep cool. Store locked up.
Disposal:	Dispose of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.
Other hazards which do not result in GHS classification:	Static accumulating flammable liquid can become electrostatically charged even in bonded and grounded equipment. Sparks may ignite liquid and vapor. May cause flash fire or explosion.
Substance(s) formed under the conditions of use:	Generates methanol during cure.

3. Composition/information on ingredients

MOMENTIVE

inventing possibilities

#### **Mixtures**

Chemical Identity	CAS number	Content in percent (%)*	Notes
Titanium, Bis(ethyl acetoacetato)-diispropoxy	27858-32-8	1 - <5%	# This substance has workplace exposure limit(s).
Octamethylcyclotetrasiloxane	556-67-2	0.1 - <1%	# This substance has workplace exposure limit(s).

\* All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

4. First-aid measures		
General information:	No action shall be taken involving any personal risk or without suitable training.	
Ingestion:	If swallowed, do NOT induce vomiting. Give a glass of water.	
Inhalation:	If inhaled, remove to fresh air. If not breathing give artificial respiration using a barrier device. If breathing is difficult give oxygen. Get medical attention.	
Skin Contact:	Wash contaminated clothing before reuse. In case of contact, immediately flush skin with plenty of soap and water for at least 15 minutes. Get medical attention.	
Eye contact:	In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.	
Most important symptoms/effect	ts, acute and delayed	
Symptoms:	No data available.	
Hazards:	No data available.	
Indication of immediate medica	l attention and special treatment needed	
Treatment:	Treatment is symptomatic and supportive.	
5. Fire-fighting measures		
General Fire Hazards:	Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Use standard firefighting procedures and consider the hazards of other involved materials.	

# Suitable (and unsuitable) extinguishing media

Suitable extinguishing media:	Water spray Carbon dioxide Foam.
Unsuitable extinguishing media:	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical:	In case of fire, carbon monoxide and carbon dioxide may be formed. Acute overexposure to the products of combustion may result in irritation of the respiratory tract. Measurements at temperatures above 150°C in presence of air (oxygen) have shown that small amounts of formaldehyde are formed due to oxidative degradation.
Special protective equipment an	d precautions for firefighters
Special fire fighting procedures:	When using do not smoke. Do not empty into drains.
Special protective equipment for fire-fighters:	CombustibleThis product or a component thereof can flow along surfacesto reach a distant ignition source and flash back. Firefighters must wear NIOSH/MSHA approved positive pressure self-contained breathing apparatus with full face mask and full protective clothing.

# 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:	Product releases methanol during application and curing. Avoid contact with eyes, skin, and clothing. Use only in well-ventilated areas. Avoid inhalation of vapors and spray mists. Keep container closed. Keep out of reach of children. See Section 8 of the SDS for Personal Protective Equipment.
Methods and material for containment and cleaning up:	Wear proper protective equipment as specified in the protective equipment section. Wipe, scrape, or soak up in an inert material and put in a container intended for flammable materials for disposal. Warn other workers of spill. Keep unauthorized personnel away.
Notification Procedures:	Caution: Contaminated surfaces may be slippery. See Section 8 of the SDS for Personal Protective Equipment.
Environmental Precautions:	Do not allow runoff to sewer, waterway or ground.
7. Handling and storage	

Precautions for safe handling:	Sensitivity to static discharge is expected; material has a flash point below
	200 F. Do not get in eyes, on skin, on clothing. Do not taste or swallow. Use
	only in well-ventilated areas. See Section 8 of the SDS for Personal
	Protective Equipment.

Conditions for safe storage,	Keep container tightly closed. Recommended storage in original container
including any	below 30'C (85'F).
incompatibilities:	

## 8. Exposure controls/personal protection

## **Control Parameters**

#### **Occupational Exposure Limits**

Chemical Identity	Туре	Exposure Limit Values	Source
Octamethylcyclotetrasiloxane	TWA	5 ppm	
Octamethylcyclotetrasiloxane - Vapor.	ST ESL	1,000 µg/m3	US. Texas. Effects Screening Levels (Texas Commission on Environmental Quality) (11 2016)
	AN ESL	100 µg/m3	US. Texas. Effects Screening Levels (Texas Commission on Environmental Quality) (11 2016)
Octamethylcyclotetrasiloxane	TWA	10 ppm	US. OARS. WEELs Workplace Environmental Exposure Level Guide (2014)

Appropriate Engineering Controls	Eye wash facilities and emergency shower must be available when handling this product.	
Individual protection measures, s	uch as personal protective equipment	
General information:	Ventilation and other forms of engineering controls are preferred for controlling exposures. Respiratory protection may be needed for non-routine or emergency situations.	
Eye/face protection:	Monogoggles	
Skin Protection Hand Protection:	Chemical resistant gloves	
Other:	Wear rubber apron. Wear suitable protective clothing and eye/face protection.	
Respiratory Protection:	If exposure limits are exceeded or respiratory irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Supplied air respirators may be required for non-routine or emergency situations. Respiratory protection must be provided in accordance with OSHA regulations (see 29CFR 1910.134).	

**Hygiene measures:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing to remove contaminants. Discard contaminated footwear that cannot be cleaned.

# 9. Physical and chemical properties

# Appearance

Physical state:	liquid
Form:	liquid
Color:	Milky white
Odor:	Mild
Odor threshold:	No data available.
pH:	No data available.
Melting point/freezing point:	No data available.
Initial boiling point and boiling range:	No data available.
Flash Point:	81.5 °C (ASTM D56 (Tag (Closed Cup)))
Evaporation rate:	No data available.
Flammability (solid, gas):	No data available.
Upper/lower limit on flammability or explosiv	e limits
Flammability limit - upper (%):	No data available.
Flammability limit - lower (%):	No data available.
Explosive limit - upper (%):	No data available.
Explosive limit - lower (%):	No data available.
Heat of combustion:	No data available.
Vapor pressure:	No data available.
Vapor density:	No data available.
Density:	1.03 g/cm3
Relative density:	1.03
Solubility(ies)	
Solubility in water:	No data available.
Solubility (other):	No data available.
Partition coefficient (n-octanol/water) Log Pow:	No data available.
Auto-ignition temperature:	No data available.
Decomposition temperature:	No data available.
SADT:	No data available.
Viscosity, dynamic:	$10,000$ mBa a $(10, \circ C) + 12,000$ mBa a $(22, \circ C)$
	10,000 mPa·s (40 °C)   12,000 mPa·s (23 °C)
Viscosity, kinematic:	No data available.
Viscosity, kinematic: VOC:	

# 10. Stability and reactivity

Reactivity:	No dangerous reaction if used as recommended.	
Chemical Stability:	Material is stable under normal conditions.	
Possibility of hazardous reactions:	Hazardous polymerisation does not occur.	
SDS_US		6/14

Conditions to avoid:	Keep away from heat. Keep away from sources of ignition - No smoking.
Incompatible Materials:	Water. Acids. Bases.
Hazardous Decomposition Products:	Carbon oxides Oxides of silicon. Measurements at temperatures above 150°C in presence of air (oxygen) have shown that small amounts of formaldehyde are formed due to oxidative degradation.

# 11. Toxicological information

Information on likely routes of e Ingestion:	xposure No data available.
Inhalation:	No data available.
Skin Contact:	No data available.
Eye contact:	No data available.
Symptoms related to the physica Ingestion:	al, chemical and toxicological characteristics No data available.
Inhalation:	No data available.
Skin Contact:	No data available.
Eye contact:	No data available.
Information on toxicological effe	ects
Acute toxicity (list all possible routes of exposure)	
Oral Product:	Not classified for acute toxicity based on available data.
Specified substance(s): Octamethylcyclotetrasilox ane	LD 50 (Rat): 4,800 mg/kg
Dermal Product:	Not classified for acute toxicity based on available data.
Specified substance(s): Octamethylcyclotetrasilox ane	LD 50 (Rat): > 2,400 mg/kg
Inhalation Product:	Not classified for acute toxicity based on available data.

Reproductive toxicity Product:	No data available.		

# Specific Target Organ Toxicity - Single Exposure

SDS\_US

Product:	No c	data available.
Specific Target Organ Product:	• •	a <b>ted Exposure</b> data available.
Aspiration Hazard Product:	No c	data available.
Other effects:	No c	data available.
Specified substan Octameth oxane	nce(s): hylcyclotetrasil	Octamethylcyclotetrasiloxane (D4) Ingestion: Rodents given large doses via oral gavage of Octamethylcyclotetrasiloxane (1600mg/kg/day,14 days), developed increased liver weights relative to unexposed control animals due to hepatocellular hyperplasia (increased number of liver cells which appear normal) as well as hypertrophy (increased cell size). Inhalation: In inhalation studies, laboratory rodents exposed to Octamethylcyclotetrasiloxane (300 ppm five days/week, 90 days) developed increased liver weights in female animals relative to unexposed control animals. When the exposure was stopped, liver weights returned to normal. Microscopic examination of the liver cells did not show any evidence of pathology. This response in rats, which does not affect the animal's health, is well-documented and widely recognized. It is related to an increase of liver enzymes that metabolize and eliminate a material from the body. The increased liver weight reverses even while the D4 exposure continues. The finding is not adverse, but is considered a natural adaptive change in rats, and does not represent a hazard to humans. Inhalation studies were conducted (whole body inhalation, 70 days prior to mating, through mating, gestation and lactation), with D4. Rats were exposed to 70 and 700 ppm. In the 700 ppm group, there was a statistically significant reduction in mean litter size and in implantation sites. No D4 related clinical signs were observed in the pups and no exposure related pathological findings were found. A two-year, combined chronic/carcinogenicity study, during which rats were exposed to D4 by inhalation, data showed a statistically significant increase in a benign uterine tumor in female rats exposed at the highest levela level much higher than the low levels that consumers or workers may encounter. An expert panel of independent scientists who have reviewed the results of this research concur that the finding seen in the two-year study occurred through a biological pathway that is specific to the rat and is no

## 12. Ecological information

**Ecotoxicity:** Acute hazards to the aquatic environment: Fish Product: **Aquatic Invertebrates Product:** Chronic hazards to the aquatic environment:

Fish **Product:** 

No data available.

No data available.

No data available.

**Aquatic Invertebrates Product:** No data available.

**Toxicity to Aquatic Plants** Product: No data available.

## Persistence and Degradability

**Biodegradation** Product: No data available.

Specified substance(s): Octamethylcyclotetrasilox 3.7 % (29 d, 310 Ready Biodegradability - CO2 in Sealed Vessels ane (Headspace Test)) Not readily biodegradable.

**BOD/COD** Ratio **Product:** No data available.

**Bioaccumulative potential Bioconcentration Factor (BCF) Product:** No data available.

> Specified substance(s): Fathead Minnow, Bioconcentration Factor (BCF): 12.40 Octamethylcyclotetrasilox ane

Partition Coefficient n-octanol / water (log Kow) **Product:**
