GE SWS is for new and remedial weathersealing applications and excellent for a broad range of substrates with high degrees of expansion and contraction.

- **Durability** - long-term resistance to natural weathering including: UV rays, variable temperatures and the elements
- **Performance** - excellent joint movement (+/- 35%) capability in both extension and compression with superior recovery after cycling
- **Primerless Adhesion** - adheres to most common substrates and finishes, including precast concrete, site cast concrete and tilt-up concrete joints, glass, plastics, anodized aluminum, brick and concrete
- **Worklife** - extended worklife for placement, tooling before skinning
- **Potential Uses** - general-purpose sealant also for seams, curtain wall frames, screw heads, back pans, etc.

Meets or Exceeds ASTM C920, Type S, Grade NS, Class 35, Use A, G, M & O

Packaging: 10.1 oz. tubes / 20 oz. sausage packs
Colors: white, black, limestone, light grey, aluminum grey, dark gray, bronze, precast white, champagne and sandy beige

SilPruf SCS9000NB

High-strength weatherproofing silicone sealant

Protect and preserve your structure.

SilPruf SCS9000NB silicone is a neutral cure, medium modulus, matte-finish silicone used in weatherproofing applications. SCS9000NB reduces or eliminates dirt pick-up and sealant bleeding or staining. SCS900 is also available in a variety of popular colors and is offered in 10oz cartridges, 20oz sausage packs as well as 2 gallon pails. It offers durability and long term adhesion to a wide variety of substrates including challenging materials like EIFS, concrete, metals and plastics.

- 100% Silicone
- Non-Staining
- Low Dirt Pick-up
- Durable- Watertight Seal
- Flexible Seal- Will not Crack or Shrink
