SOLUTIONS

**HELP YOU BUILD
THE WORLD**

**Georgia-Pacific
Gypsum**

TRUSTED SOLUTIONS THAT GO WHEREVER YOU BUILD

Dens® Solutions are industry trusted, high-performing fiberglass mat gypsum panels suitable for your wall, roof, ceiling and floor projects. Dens® Solutions carry the mark of our valued heritage in Gold®, our patented color, as a visible standard-

bearer of our position as the first manufacturer to create a fiberglass mat board and as a relentless innovator of strength and moisture resistant products for over 30 years. **Dens® Solutions answer building challenges with ingenuity.**

For more information visit DensWorldWide.com for regional contacts, tech support, and submittal and other resources.

THE INNOVATIVE INTEGRATED SHEATHING SYSTEM

Building on our industry-leading DensGlass® fiberglass mat gypsum sheathing, our DensElement® Barrier System with AquaKor™ Technology is an innovative integrated sheathing system that:

- integrates the gypsum core and fiberglass mat
- forms a hydrophobic, monolithic surface
- blocks bulk water, allows vapor to pass through
- doesn't need an additional WRB-AB
- saves installation time

REDEFINING YOUR ROOF ASSEMBLY

DensDeck®
Prime Roof Board
with **EONIC™**
TECHNOLOGY

A significant leap forward for the roofing industry, DensDeck® Prime Roof Board:

- is the only roof board that meets the new 3-Part Spec
- mitigates the risk of damage from environmental and man-made threats
- resists wind uplift through greater flexural strength¹

GP Georgia-Pacific
DensShield®
Tile Backer

THE TILE BACKER THAT BACKS YOU UP

The first backer board with a built-in moisture barrier, DensShield® Tile Backer:

- is built to fight moisture and humidity
- stops water intrusion at the surface
- simple 3-step install saves time: measure & cut, fasten, caulk and tape

GP Georgia-Pacific
DensGlass®

THE LEGENDARY SHEATHING SOLUTION

With a record of exemplary performance that spans more than 30 years, DensGlass®:

- is the number one architecturally specified fiberglass mat gypsum sheathing¹
- helps protect structures against moisture damage during and after construction
- is used for attached, adhered, and fluid-applied air- and water-resistant barrier systems

SHAFTLINER

This architecturally specified fiberglass mat gypsum liner panel is:

- ideal for use in moisture-prone vertical and horizontal shaftwall assemblies, stairwell applications and area separation walls
- ideal in commercial and multifamily construction
- an ideal substitute for heavy masonry construction in fire-rated assemblies

1. Based upon survey of CMD Group project specifications from 01/01/17 - 12/31/17.

DensArmor Plus®

Interior Panel

ABUSE-RESISTANT INTERIOR PANEL

Extra protection for high traffic areas, DensArmor Plus® Abuse-Resistant Interior Panels:

- are formulated for corridors in hospitals, schools and other public buildings
- resist abrasions, gouging, indentation, scrapes and bumps that can mar traditional drywall

IMPACT-RESISTANT INTERIOR PANEL

Designed as a replacement for paper-faced panels in commercial building interiors:

- provides extra resistance where it's needed most
- are moisture and mold-resistant
- are ideal for ultra-high traffic areas such as corridors in healthcare facilities, schools and correctional institutions

Wherever you're building across the globe, our world-class logistics deliver. Our international organization puts you and your job requirements first, ensuring Dens® Solutions arrive where, when and how you need them—no matter what corner of the world you're building.
