

OSB, One Step Better

Protection From the Elements

DryGuard® OSB is a multi-layered sub-floor product that has improved moisture resistance throughout the panel, plus an enhanced black edge seal to help reduce moisture absorption. This means protection from the elements that helps avoid costly and time consuming joint sanding.

A High Performance Sub-Floor

Because there are no core voids, knots or splits, the panels have enhanced nail holding ability, stiffness and strength. DryGuard OSB is sanded on the face for surface consistency, has drain scores for enhanced surface drainage and is a sub-floor panel that can be relied on job after job.

200 Day No-Sand Guarantee

DryGuard is backed by a 200 day no-sand guarantee* that covers the edges of the panels, plus a lifetime limited warranty, giving peace of mind for both you and your homeowner.

*See warranty for complete details available at www.buildgp.com/warranties or 800-284-5347.
