

Hidden Deck Fasteners

DECKMASTER®
HIDDEN DECK FASTENING SYSTEM

The strongest longest lasting decks are built using Deckmaster® brackets. Its unique under mount design uses fasteners at two angles, virtually eliminating deck racking and shearing. And because Deckmaster® is completely hidden beneath the deck boards, there are no exposed screws or nails on the deck surface. As such, moisture won't pool around screws and nails reducing the potential for water damage associated with decks top fastened with screws or nails. Deckmaster® is the best hidden fastening system available.

- ▶ **50 year warranty for powder coated brackets**
- ▶ **ACQ compliant**
- ▶ **Outstanding corrosion resistance**
- ▶ **LOX® 2 recess for a sure driving experience**

Deckmaster® Powder Coated Bracket and Screws

22-1/2" Long

Deckmaster® packaging shown in 10 bracket box. Also available in 100 bracket box.

Deckmaster decks are built to last

Grabber's Deckmaster Fastening System is designed to hide all fasteners beneath the deckboards making the deck stronger and more durable. With Deckmaster there are no exposed screws a primary entry point for moisture and deck board damage. Stains and splinters around fastener holes are eliminated because there are no exposed screws or nails.
