

Dome Head Driller - Interior

Heavy-Gauge Steel-to-Steel

GRABBER®
CONSTRUCTION PRODUCTS

Description Framing steel. K-lath installation in steel substrate.

Specifications

Size | Gauge: #8

Length: 1/2 in. to 2 in.

Head Type: Dome Head

Recess Type: #2 LOX®, #2 Phillips

Thread Type: Fine, Single Lead

Finish: Clear Zinc, GrabberGard® Gray, Phosphate, Yellow Zinc

Quality Assurance: Grabber® fasteners are manufactured in ISO 9001 and ISO 14001 certified and approved factories.

LEED Reporting: The post-consumer recycled steel content is 25%.

Compliance: The fasteners comply with ASTM C954 and C1513 performance requirements. Specific fasteners are listed in ICC ESR-1271; please check the report for listed item numbers.

Applications

- Heavy-gauge steel framing studs
- K-lath installation to heavy-gauge steel
- Heavy-gauge steel studs to door frame jamb anchor clips

- Heavy-gauge steel studs to track
- Other heavy steel-to-steel attachments

Installation

- Use a standard screw gun with a depth-sensitive nose piece. Suggested screw gun specification for optimal performance: size #8, up to 2,500 RPM.
- Because of significantly higher torque output, care and caution should be exercised when using an impact driver; otherwise, screw failure or spin-out may occur.
- The head is fully seated when the bearing surface of the head is flush with the work surface.
- The fastener must penetrate beyond the steel three full thread pitches.
- Overdriving may result in failure of the fastener.

Features

- LOX® recess is designed for high-torque applications and will not strip out like most other recesses.
- Grabber's #2 Phillips is a precision recess designed for better bit engagement, resulting in less wobble or strip-out.
- Self-tapping drill point is designed for penetration into heavy-gauge steel.
- Dome head design provides for a larger load-bearing surface for better holding power, and a lower profile.
- Consistently formed extra-sharp drill point starts and drills easily into heavy-gauge steel framing.

Standard Corrosion Test Results

Finish	Test	Standard/Protocol	Results
Clear Zinc	Salt Spray	ASTM B117	12 hrs., no red rust
Yellow Zinc	Salt Spray	ASTM B117	24 hrs., no red rust
Phosphate	Salt Spray	ASTM B117	24 hrs., no red rust
GrabberGard®	Salt Spray	ASTM B117	1,000 hrs., no red rust

Note: Salt Spray Testing (SST) results are not intended to predict corrosion in real-world environments. The ASTM B117 standard for SST is recognized industry-wide as an effective tool for comparing different metals and different metal coatings in a tightly controlled, highly corrosive environment for specific periods of time. For more information about corrosion resistance, see the Grabber Guide to Corrosion Resistance for Fasteners.
