Flat Head PlySteel Screws - Interior

Sheathing to Heavy-Gauge Steel

Description

Attaches sheathing and plywood/OSB subfloor panels to heavy-gauge steel.

Specifications

Size | Gauge: #10

Length: 1 1/2 in. to 2 1/2 in. Head Type: Flat Head Recess Type: #3 LOX®

Thread Type: High-Lo Alternating,

Single Lead Finish: Yellow 7 inc. Quality Assurance: Grabber® fasteners are manufactured in ISO 9001 and ISO 14001 certified and approved factories.

LEED Reporting: The post-consumer recycled steel content is 25%.

Compliance: The fasteners comply with ASTM C1513 performance requirements.

Applications

Attaches plywood/OSB subfloor paneling and other sheathing to heavy-gauge steel

Installation

- Use a standard screw gun with a depth-sensitive nose piece. Suggested screw gun specification for optimal performance: size #10, up to 2,500 RPM.
- Because of significantly higher torque output, care and caution should be exercised when using an impact driver; otherwise, screw failure or spin-out may occur.
- The flat head is fully seated when it is flush with the work surface.
- The fastener must penetrate beyond the steel three full thread pitches.
- Overdriving may result in failure of the fastener.

Features

- LOX[®] recess is designed for hightorque applications and will not strip out like most other recesses.
- Hi-Lo threads decrease needed torque.
- Special wings clear away sheathing material as the fastener drives in.
- The flat head leaves a smooth, finished surface.
- Consistently formed extra-sharp drill point starts and drills easily into heavy-gauge steel.

Standard Corrosion **Test Results**

| Finish | Test | Standard/Protocol | Results |
|-------------|------------|-------------------|----------------------|
| Yellow Zinc | Salt Spray | ASTM B117 | 24 hrs., no red rust |

Note: Salt Spray Testing (SST) results are not intended to predict corrosion in real-world environments. The ASTM B117 standard for SST is recognized industry-wide as an effective tool for comparing different metals and different metal coatings in a tightly controlled, highly corrosive environment for specific periods of time. For more information about corrosion resistance, see the Grabber Guide to Corrosion Resistance for Fasteners.
