

Revised Flat Pan Head Driller

Heavy-Gauge Steel to Heavy-Gauge Steel

Description Heavy-gauge steel to heavy-gauge steel connections.

Specifications

Size | Gauge: #10
Length: 3/4 in.
Head Type: Revised Flat Pan Head
Recess Type: X-Drive
Thread Type: Fine
Thread Length: Varies by item.
 Refer to the thread length reference section for specific dimensions.

Finish: GrabberGard®
Quality Assurance: Grabber® fasteners are manufactured in ISO 9001 and ISO 14001 certified and approved factories.
LEED Reporting: The post-consumer recycled steel content is 25%.
Compliance: The fasteners comply with ASTM C1513 performance requirements.

Applications

- Heavy-gauge steel framing to heavy-gauge steel
- Strapping to heavy-gauge steel
- Fixtures to heavy-gauge steel

Installation

- Use a standard screw gun with a depth-sensitive nose piece. Suggested screw gun specification for optimal performance: size #10, up to 2,500 RPM.
- Because of significantly higher torque output, care and caution should be exercised when using an impact driver; otherwise, screw failure or spin-out may occur.
- The revised flat pan head is fully seated when it is flush with the work surface.
- The fastener must penetrate beyond the steel three full thread pitches.
- Overdriving may result in failure of the fastener.

Features

- Revised flat pan head design provides a larger load-bearing surface for better holding power.
- Underhead serrations lock tight in steel-to-steel applications.
- Self-tapping drill point is designed for penetration into heavy-gauge steel.
- Consistently formed extra-sharp drill point starts and drills easily into heavy-gauge steel.
- GrabberGard® exterior-grade coating provides additional protection against corrosion in most exterior applications.

Standard Corrosion Test Results

Finish	Test	Standard/Protocol	Results
GrabberGard®	Salt Spray	ASTM B117	1,000 hrs., no red rust

Note: Salt Spray Testing (SST) results are not intended to predict corrosion in real-world environments. The ASTM B117 standard for SST is recognized industry-wide as an effective tool for comparing different metals and different metal coatings in a tightly controlled, highly corrosive environment for specific periods of time. For more information about corrosion resistance, see the Grabber Guide to Corrosion Resistance for Fasteners.
