

Grabber scaffolds are interchangeable with the Perry Scaffolds

Grabber to Perry:

Ability to stack units without modification
Safety and Guard Rails
Planks
Caster

Perry to Grabber:

Ability to stack units without modification
Safety and Guard Rails
Caster
Outriggers

Perry Planks will not work on the Grabber Scaffold without having to drill holes in the planks to accommodate the peg lock safety feature on our units.

Perry outriggers will work with the Grabber unit. Only use Grabber model #'s 77056 and 77057 Grabber Outriggers with the Perry units. Perry outriggers have a left and right attribute and the holes to secure outriggers.

Grabber Scaffolds are manufactured by:
Granite Industries, Inc.
595 E. Lugbill Road
Archbold, OH 43502
