

LEED Certification

Henry® Blueskin PE200HT® Self-Adhered Roofing Underlayment

Henry Blueskin PE200HT is a self-adhered high temperature roofing underlayment comprised of a rubberized asphalt adhesive factory-applied to a poly film with a slip-resistant coating intended for use in roofing assemblies.

The following information may be used as a reference for LEED submittals.

Typical Physical Properties

Energy Performance	
Material air permeance (ASTM E2178)	<0.004 cfm/ft ² @ 1.57psf (0.02L/s*m ² @75Pa)
Materials and Resources	
Environmental Product Declaration (EPD)	No
Declare label	No
Health Product Declaration (HPD)	Yes
Recycled content	<ul style="list-style-type: none"> • Post-consumer: 0% • Post-industrial: 0%
Extraction site	<ul style="list-style-type: none"> • Ingredients are sourced from various locations. • Raw material extraction source information is not available.
Manufacturing locations	Petrolia, ON
Low-emitting Materials	
Product VOC content	0 g/L
