

Henry®

MetalShield®

elastomeric roof systems

Protect your metal roof from:

the sun's heat and UV radiation

rust and corrosion

acid rain and mildew

damaging leaks

costly roof replacement

Don't replace your metal roof...renew it!

Enjoy an enhanced appearance, and stop leaks on your metal roof, at about half the cost of reroofing.

Henry MetalShield® Elastomeric Roof Systems are simply the best way to leak-proof your metal roof and keep it looking new. Developed by the recognized leader in protective coatings, MetalShield® is designed to cool and protect existing corrugated steel, standing seam or metal roof substrates.

MetalShield® is not just a coating though—it is a complete metal roof restoration system that repairs, reinforces, and coats your metal roof. With a high customer satisfaction rate, and high-profile, landmark jobs, Henry MetalShield® is the name you can trust when it comes to protecting your building investment.

“Cool your roof, and **protect**

MetalShield®

elastomeric roof systems

The benefits of using a MetalShield® system to restore your metal roof

- Energy saving, brilliant white, reflective finish coat
- Lowers roof surface temperatures
- Reduces air conditioning costs
- Stops leaks and prevents rust formation
- Resists acid rain, fungus, and other contaminants
- Locks in fasteners and seals seams
- Improves the aesthetics and value of your structure
