

VRA™ PLANTS

For Vegetative Roof Assemblies

Description

Henry VRA™ Plants are a variety of regionally grown vegetation for use on Vegetative Roof Assemblies or “green” roofs. Custom grown for each project meeting the design and use specified for each application. Plants are supplied to installer as plugs, mats or cuttings.

Features

- Grown and blended for each project in controlled conditions
- Plugs, mats or cuttings are available
- Delivered to jobsite in construction-friendly packaging
- Single source warranty available for all components in assembly

Uses

Henry VRA™ Plants are available in nearly every variety for extensive and intensive roofs. Pre-grown sedum mats, while higher cost per square foot, provide a finished look from day-one. Cuttings, applicable to some regions, are the lowest cost option but take the longest time to grow and additional maintenance to reach the intended, finished look. Multiple applications are generally required. Nearly any plant desired can be provided.

Limitations

Good maintenance practices need be followed per ASTM E2400 Standard Guide for Selection, Installation, and Maintenance of Plants for Green Roof Systems

Application

Follow guidelines of ASTM E2400 Standard Guide for Selection, Installation, and Maintenance of Plants for Green Roof Systems

Clean Up

Dispose of excess product in appropriate landfill.

Caution

Use caution when cutting and laying product. Follow all OSHA safety requirements.

Product Sizes

- VRA Plants – Plugs** are individual plants provided in custom plastic trays
- VRA Plants – Mats** are pre-grown sedums which are rolled and palletized
- VRA Plants – Cuttings** are individual species or a mix of sedum cuttings in boxes
