

# Henry® MiraSEAL

## New Formula Saves Time, Keeps Your Projects Moving

Contractors have trusted Henry® MiraSEAL for years to accelerate construction schedules, thanks to its unique ability to be applied directly to green concrete. Now featuring a new and improved low-viscosity formula, this patented, cold fluid-applied waterproofing membrane promises to speed up timelines more than ever before.

## FAST, EASY APPLICATION

MiraSEAL's new low-viscosity formula offers easier spreading for a smoother, faster installation. It is solvent-free, odorless, non-flammable, and requires no hot kettles, ensuring safe use even in confined spaces. MiraSEAL also allows for simple detailing of critical areas such as transitions and angle changes.

## PROVEN PERFORMANCE

MiraSEAL meets ASTM C836 standards, which ensures a membrane's ability to resist water penetration, retain flexibility, and maintain strong adhesion, even in tough conditions. By meeting these standards, contractors can count on MiraSEAL to provide dependable moisture protection along with the flexibility and durability needed for a variety of below-grade waterproofing applications.

## IDEAL FOR MULTIPLE APPLICATIONS

MiraSEAL is versatile and perfect for many waterproofing needs:

- ✓ Below-grade foundation walls
- ✓ Plaza decks and balconies
- ✓ Protected roof membranes
- ✓ Vegetative and green roofs
- ✓ Tunnels
- ✓ Between-slab applications

## Experience the Difference

Experience the ease, speed, and superior performance of MiraSEAL. Contact us today to discover how Henry can help you achieve your project goals with confidence.
