

Henry® Custom Color Program Roof Coatings

Pro-Grade® 988 Silicone Top Coatings

Henry Commercial Roof Restoration Products Provide Durability and Performance in a Variety of Colors.

Specialty Colors & Mastic (Level 1)

Looking to enhance the aesthetics of your commercial roof restoration project or to provide special colored designs? Henry Pro-Grade 988 Silicone Roof Coatings are available in several specialty colors.

Henry Pro-Grade 923 is also offered in the specialty colors of black and clear. All specialty colors require a minimum order of 30 gallons, please allow a 10 day lead time.

Size: 5 Gallon Pail and 55 Gallon Drum

Dark Gray

Black

Clear

Standard Custom Colors (Level 2)

Standard Custom Colors are available when your project demands a colored silicone that doesn't allow for the extended lead time for full custom color matching. Standard Custom colors provide a shorter lead to help meet the needs of your project.

Minimum order quantity 180-gallons, please allow 15 business days lead time.

Samples are available upon request in wet or draw down format.

Size: 5 Gallon Pail and 55 Gallon Drum

Hunter Green

Barn Red

Dark Brown

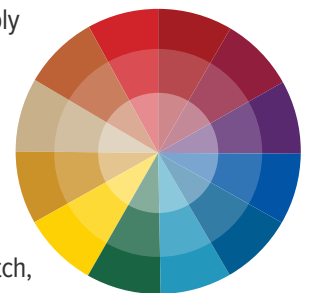

Regal Blue

Silicone Custom Color Match Colors (Level 3)

Henry is also proud to offer silicone in custom colors, ideal for situations where a color match is required. Simply fill out the custom color request form and provide the PMS or Sherwin Williams Color swatch/color reference number, once approval of the color has been given please allow 3 weeks lead time from approval. Minimum order quantity 180 gallons. Samples are available in wet, or draw down. Please indicate on the order form your preference of sample type to provide final color approval prior to order being processed.

Size: 5 Gallon Pail or 55 Gallon Drum

Custom colors are non-refundable. Though every effort is made to maintain color consistency from batch to batch, there may be slight color variations. In addition, gloss and color may vary due to weather conditions, application technique, and substrate texture.

Colors on screen may appear slightly different than actual colors. Request physical color chip to confirm actual color. We cannot make metallic pigmented colors. Gloss and color may vary due to weather conditions, application technique, and substrate texture.
