Residential and Light Commercial Henry® 1-2-3 Moisture Control System™ Warranty

Subject to the terms and conditions of this warranty, this Moisture Control System is expressly warranted for a period of fifteen (15) years from purchase to perform to Henry Company LLC, a Carlisle Company (collectively with its subsidiaries and affiliates, "Henry"), published specifications when installed according to Henry installation procedures and accepted industry standards or installation details prepared by a properly licensed design professional. In the event of a warranty claim, Henry will pay, subject to the limits of this warranty, the cost of materials and labor to correct leaks that result solely from the failure of Henry product as expressly warranted herein.

Only buildings constructed in the United States that are single family, duplex, low rise multi-family, or light commercial buildings constructed using wood-based structural sheathing and not exceeding max height allowances as per 2018 IBC (Table 504.3) for Type V (70 ft) and Type III (85 ft) shall qualify for this Moisture Control System warranty.

Substitution of WRB, flashing products, insulation, or sealant with products manufactured by others, or an ineligible Henry Product not listed above, voids this warranty, in which case Henry's standard Product warranty shall apply.

*When installing PlyDry, butyl-based flashing must be used. This includes Blueskin Zero Flash, Fortiflash Butyl, and FortiFlash Fusion. The use of any other mechanically fastened or asphalt-based flashing will not qualify for the warranty.

Owner must provide proof of purchase or installation for the entire Building Envelope System in connection with any warranty claim. This warranty can only be transferred to a subsequent owner one time only.
