TECH-SPOTLIGHT

MIGHTY-FLASH™ SEALANT COMPATIBILITY CHART

There are various locations in a wall system where the thru-wall flashing and a construction sealant are used together to form a weather-tight seal, i.e. relief angles, soft joints, door and window perimeters and drip edges. Hohmann & Barnard's Mighty-Flash™ Membrane is compatible and has been tested for adhesion and compatibility by various sealant manufacturers.

The listing below gives a selection of both silicones and urethanes that have been evaluated. In all cases, the sealant manufacturer's application procedure should be followed and they recommend that field adhesion testing should be continued throughout all projects.

SILICONES

Company	Product	Primer Required
Dow Corning	**790**	**1200 Prime Coat**
	791	**1200 Prime Coat**
	795 (Dark colors only; Black, Charcoal, or Bronze)	**1200 Prime Coat**
G.E. Silicones	**Silpruf**	**SS4179**
Pecora	**890**	**P-120**
	895	**P-120**
Tremco	**Spectrum 2**	**#10**

URETHANES

Company	Product	Primer Required
SIKA	**Sikaflex-1A**	**#260-205**
Sonneborn	**Sonolastic NP1**	**#733**
Tremco	**Dymonic**	**#6 or #17**

NOTE: When using with insulation, please verify the compatibility with the manufacturer.
