

.157

True Embedment Pin

The Ramset® **.157 True Embedment Pin** is sized to provide you with True Embedment depths in track up to 14 gauge. You are assured to meet the required embedment depths into concrete or steel without compensating for the track depth. The pin heads are also stamped for easy identification after installation.

Key Features and Benefits

- No more increasing pin size to achieve required embedment
 - Less wear and tear on tools and manpower
 - Head stamps make for easy inspection
- 
- Embedment depth is easily identifiable by head stamps

How they work:

For example, using the **1" .157 TE Pin**, the actual embedment depth into the concrete is 1". There is no longer a need to use a 1-1/4" pin for 1" embedment.
