

COMMERCIAL ROOFING SOLUTIONS

EVERY ROOF IS OUR REPUTATION

Choosing the right roofing solution could be challenging. We have the knowledge and resources to make it easy.

Here at Johns Manville, our team is available to answer your design professionals' questions in order to determine the best options at each phase of your project.

You gain ongoing support from our experienced system experts, who understand and value the integration of roofing systems. You can also count on technical assistance and continuous support throughout the entire life of your project through your JM Peak Advantage® Guarantee.

Our professionalism, excellence, innovation and focus have been the source of our solid reputation at Johns Manville for more than 160 years.

We proudly acknowledge this legacy and continue to build it.

1858

21-year-old Henry Ward Johns uses his wife's clothes wringer and a teakettle to apply hot tar to cloth in his New York City basement. By doing so, he creates the company's first roofing shingles.

H.W. Johns Manufacturing Company and Manville Covering Company merge to form the H.W. Johns-Manville Company, New York, New York.

JM becomes a public company.

1927

1926
The company reincorporates as Johns-Manville Corporation.

1972
JM relocates headquarters from New York City, New York, to Denver, Colorado.

JM enters the single ply market.

1979

JM begins manufacturing SBS.

1993

1994
JM acquires the commercial roofing business from Owens Corning, gaining the Oklahoma City, Oklahoma, BUR plant.

JM invests in the bituminous business by acquiring the DIBITEN plant in South Gate, California, and five Nord Bitumi plants across the world.

JM enters the polyisocyanurate market by acquiring NRG Barriers.

1996

JM enters the PVC market by purchasing HPG and Seal Dry.

1997

1998
JM builds and opens a bituminous plant in Macon, Georgia—it's the first new plant in 20 years.

JM invests in commercial roofing offering by acquiring perlite board assets from BMCA.

Berkshire Hathaway acquires Johns Manville.

2001

JM completes 160,000-square-foot manufacturing facility in Scottsboro, Alabama, to produce TPO single ply membrane.

2008

2005
JM and Cooley Group start a PVC strategic partnership.

2012
JM opens the first JM-produced EPDM membrane plant in Milan, Ohio.

JM expands the TPO business by adding a second manufacturing line.

2018

2022
JM expands ISO manufacturing by opening a manufacturing and distribution facility in Hillsboro, Texas.

The resources to get the job done right.

As we have grown over our 160-year history, our resources have as well. Our team of professionals works diligently to meet your expectations.

Online. On the phone. Face to face.

With a full array of support, we help make your project move seamlessly from start to finish.

The Right Service Starts With the Right Team.

On the phone, in person and online, we're here help you.

PREFERRED ACCOUNTS

Develops strong relationships with building owners and assists in maximizing roofing system value and performance.

Addresses the concerns of roofing schedules, quality and risk to help improve project outcomes.

SPECIFIER SERVICES

Provides individualized assistance and information to your design, engineering and architectural teams.

BUILDING CONSTRUCTOR SERVICES

Comprised of designated teams for pricing and ordering needs.

Cultivate relationships with regional customers across North America.

SALES REPS

CUSTOMER SUPPORT SERVICES

SPECIALTY DESIGN TEAMS

The Tapered Insulation Design Team and the Specialty Roofing Team create custom design solutions.

PEAK ADVANTAGE CONTRACTORS

The Johns Manville Peak Advantage program is one of the most exclusive loyalty programs within the commercial roofing industry.

JM PEAK ADVANTAGE GUARANTEE APPLICATION AND APPROVALS

Delivers one of the most comprehensive labor and materials guarantees in the roofing industry.

FIELD TECHNICAL SERVICES

Provides technical assistance, job site inspection and field training.

OWNER SERVICES

Supports the guarantee through the life of the term with transfers, claims and solar needs.

CONTINUED EDUCATION

BURSI®

Offers customizable education and AIA Accredited courses on roofing products, systems and industry trends.

ROOFING INSTITUTE

Hands-on training for Peak Advantage® Contractors.

OUR CORE VALUES

Our core values – **People, Passion, Perform and Protect** – are embedded in everything we do. These values not only guide the way in which we conduct business, but they also serve as the foundation for our everyday words and actions. We strive to deliver positive and powerful JM Experiences to everyone with whom we interact and hope to be the Employer of Choice as well as the Supplier of Choice.

We Are People Champions. Our employees and customers are at the core of everything we do. We strive to see the world through their eyes.

Our Passion Is in Going the Extra Mile. We pursue fresh ideas and embrace new approaches to elevate how we work and deliver value.

We Perform at a Superior Level. We are committed to delivering profitable growth and sustainable competitive advantage.

We Protect Today to Ensure Tomorrow. Protecting our customers, employees and families and the world around us is our responsibility.

Nationwide Network of Contractors.

High-quality JM roofing products are critical to achieving the maximum performance of our roofing systems. We also work with independent professional roofing contractors who have demonstrated their capability in commercial roofing installations as well as a high affinity for quality. Our high standard of commitment and excellence is reflected in our nationwide network of Peak Advantage® contractors.

One of the Most Comprehensive Guarantees in the Industry.

We are proud to offer one of the most comprehensive guarantees in the commercial roofing industry. When a building owner purchases a roof system from a contractor with a JM Peak Advantage Guarantee, multiple options let them customize the Guarantee coverage to best suit their or their project's needs.

THE RIGHT RESOURCES INCLUDE NATIONWIDE DISTRIBUTION

We have strategically placed our distribution and manufacturing facilities across the nation to ensure that materials reach your destination on time.

We have numerous locations coast to coast, so you can be confident that our quality products will ship right to your job site.

The most expansive portfolio of solutions.

At Johns Manville, we take great pride in offering an ever-expanding line of roofing products to accommodate every specific need possible. Our ongoing pursuit of new solutions unveiled many innovations, including the newest single ply production technology available in the industry.

Even with this comprehensive range of solutions, every JM product undergoes rigorous testing to ensure that all consistently achieve our high standards. We believe in adhering consistently to this process to fully satisfy our customers and properly back our Peak Advantage® Guarantee.

BUILT-IN REDUNDANCY

ADVANCED WEATHERABILITY

ELASTICITY

LONGEVITY

CHEMICAL RESISTANCE

COST EFFICIENCY

SEAMLESS WATERPROOFING

ADVANCED MEMBRANES

We are dedicated to delivering a true integrated line of roofing components, proven to work together while meeting specifications for virtually every building.

You can trust and depend on our products to provide the quality you need.

BUR

We pioneered built-up roofing systems in America more than 160 years ago.

Our highly reliable waterproof membrane is field-fabricated with layers of bitumen, alternating with plies of reinforcing felts.

The redundant layers give roofs exceptional resistance to water and weather. As a result, we have long-lasting, durable and worry-free systems. Few roofing companies can claim to have guaranteed over one billion feet of BUR.

APP

Our APP is formulated with a premium-grade asphalt to enhance weatherability.

Combined with nonwoven polyester or glass fiber reinforcements, our APP systems exhibit tremendous strength and weatherability.

APP is tough and economical like a thermoplastic, with the proven waterproofing of asphalt.

SBS

With over three decades of experience producing modified bitumen, we understand the science of formulating systems that last.

Our SBS is a premium modified bitumen engineered specifically for elasticity and to withstand cold, harsh environments.

SBS is the most customizable of our low-slope commercial roofing products with glass, polyester and composite reinforcements as well as heat-welded, cold-applied, hot-applied, self-adhered, and mechanically attached application methods.

EPDM

With superior durability and flexibility, EPDM is a smart roofing solution.

Our EPDM production facility is one of the world's most technologically advanced, allowing us to extrude our sheets instead of using the traditional calendaring process.

Our EPDM is manufactured thicker with a more uniform surface finish. This advancement in manufacturing cleaner sheets requires less preparation to ensure a stronger bond during installation.

PVC

Built to withstand the test of time, our PVC was made to resist the toughest weather conditions and chemicals.

Our PVC is a flexible, thermoplastic membrane manufactured using an ultraviolet-resistant polyvinyl chloride.

Using DuPont™ Elvaloy® KEE (ketone ethylene ester) as part of the formulation ensures plasticizer retention. This delivers a pliable and durable sheet with excellent weathering characteristics and resistance to harsh chemicals and industrial pollutants.

TPO

Our TPO gives you the option of a reliable, cost-effective roofing solution.

We reinforce our membranes with a polyester fabric and manufacture them using an ultraviolet-resistant thermoplastic polyolefin formulation.

We developed our TPO formulation to allow for extreme pliability, flexibility and weldability during installation.

LAR

Our liquid membrane system provides a versatile roofing and flashing system free of traditional seams.

Our system is ideal for plaza decks, garden roofs, roofs with many penetrations and small and irregular-shaped roofs. It can even be used as a flashing material on bituminous roofing systems.

Liquid-applied systems are also resistant to various chemicals, UV rays, ponding water and root penetration.

COMPLETE YOUR ROOFING SYSTEM

Along with our full line of roof membranes, we offer the additional components you need to complete your roofing system, from insulation and coatings to accessories.

COVER BOARDS

Investing in a cover board maximizes the long-term performance and resiliency of your roofing system.

At JM, we take pride in providing a full portfolio of cover board solutions that are suitable for any application. Our portfolio includes high-density polyiso, perlite, cement and gypsum.

Whether you are looking for a cover board that is moisture- and mold-resistant, has a high R-value or is suitable for high-impact areas, JM has an option for you.

INSULATION

We have a broad line of polyisocyanurate insulation products that are certified with the PIMA QualityMark®.*

Our polyiso line offers benefits such as a closed-cell foam core, resistance to indentation and crushing and high R-values. Our tapered polyiso products are designed specifically for your roof.

COATINGS

JM offers bituminous and single ply coating solutions that provide an aesthetically pleasing look for a new roof or extend the life of an existing roofing system.

Our coatings can be reflective and can help reduce heat in high-UV territories during the summer months. JM has a wide range of coating options, including acrylic, silicone and urethanes.

ADHESIVES AND CEMENTS

We provide an extensive line of adhesives and cements for all roof types.

Our selection includes sealants, cleaners and primers for every step of the installation process.

We have products designed to meet specific regional regulations and environmental requirements, work with different substrates and, in some cases, be used with multiple membranes.

SINGLE PLY ACCESSORIES

Complement your single ply membrane with our full line of accessories.

From detail membrane and T-joint patches to universal corners and safety strips, our products give you everything you need to complete the single ply membrane installation.

We also offer custom-fabricated pipe boots, walk pads and penetration pans to help with the final detail work.

SPECIALTY ROOFING PRODUCTS

Our Specialty Roofing Products group has established its expert reputation by offering custom-fabricated expansion joints, drains and edge metal.

We'll turn rough sketches into a custom-manufactured solution.

We designed our Expand-O-Flash® line to withstand certain levels of seismic forces, movement between building components (such as atriums and window walls) or movement caused by extreme temperatures (particularly around pipes, ducts and bulk-carrying equipment).

FASTENERS

JM provides a wide range of fasteners suited for nearly any application.

Our expansive line of fasteners and plates also offers induction-weld solutions for TPO and PVC systems.

The power of quality and innovation.

We take great pride in delivering quality, day in and day out, as we have for more than 160 years. As pioneers in the roofing industry, Johns Manville has always been committed to pursuing innovative ideas to create the superior products you need for your jobs.

HYBRID SYSTEMS

JM PVC and TPO Fleece-Backed Membranes

JM SBS Plies

PVC FB/SBS Hybrid System

This hybrid system resists chemicals while bringing the added benefit of redundant layers that add additional leak protection and strength. It's a protective white cap sheet with multiple resilient features.

TPO FB/SBS Hybrid System

This hybrid system uses the economical TPO cap layer over the redundant multi-ply SBS system, which yields a cost-effective, highly reflective cap layer with long-term multi-ply performance.

COOL ROOFS

SOLAR REFLECTIVITY

The ability to reflect the sun's energy back to the atmosphere.

THERMAL EMISSIVITY

The material's ability to shed, not retain, heat.

CRG, PVC and TPO

Highly reflective and emissive products such as our white single ply and cool roof granulated bituminous membranes can be used to save energy by combining the proper amount of roof insulation with these membranes to reduce heat significantly.

Title 24 Compliant
CRRC

WORK SMARTER

EPDM FIT: pre-taped membrane available with 20- and 30-year JM Peak Advantage® Guarantees

More productivity.

Whether you need to get in the dry faster or cover more area of a roof with less material and labor, we have products—including various membranes with self-adhering technology—that will help you achieve more efficient installs.

Self-adhering membranes.

JM TPO SA, DynaGrip®, JM Vapor Barrier SA, JM Vapor Barrier SAR, JMCleanBond®

The only manufacturer with 12-foot PVC.

JM PVC with KEE and JM PVC SD Plus

Cover boards that use 50% fewer fasteners to achieve FM-190.*

ProtectoR® HD and SeparatoR® CGF

Adhesives and primer solutions.

JM EPDM FIT – Eliminates the need for primer.

JM Water-Based Membrane Adhesives – 1-sided application reduces installation time.

JM All Season Sprayable Bonding Adhesive – Flashes off in just 5 minutes.

*When compared to other high-density polyiso cover boards over a minimum 22-gauge steel and/or structural concrete deck

TOOLS FOR THE TRADE
