502MS Karna-Flex

Rubberized Elastomeric Sealant

Karna-Flex Advantages

- Durable Elastomeric Rubber Sealant
- One component
- Easy application by brush, caulk gun or bulk loader
- Superior adhesive and cohesive strength
- Excellent low temperature flexibility
- 967% Elongation
- UV Stable-can be left exposed
- For use in all climates-will not freeze
- Waterproof upon application
- Adheres to wet or dry surfaces
- Seals metal roof seams and fasteners, foam roofs, EPDM, TPO and PVC, sprayed-in-place foam, masonry, roof penetrations and cementitious foam coatings
- Lines gutters
- Black Karna-Flex for Asphalt BUR, Mod Bit and EPDM repairs where a black-finish is desired

Karna-Flex 3-course repair on asphalt BUR with aged aluminum coating.

Karna-Flex applied on a metal roof over fasteners and in a 3-course repair over horizontal seam.

502MS Karna-Flex

Rubberized Elastomeric Sealant

Problem

Gutter seams were leaking and gutter was not large enough to handle the roof area causing backups and leaks under the metal roof.

Solution

Apply Karna-Flex to entire gutter in a 3-course application with 5540 Resat Mat over all seams and transitions from metal roof to the gutter.

Benefits

Karna-Flex is simple and economical and will perform in the gutter and on the ends of the roof panels as a waterproofing membrane even when the gutter is overflowing.

5 year-old roof repair still performing

502MS Karna-Flex

Rubberized Elastomeric Sealant

Problem

Vent stack on metal roof sealed with conventional roof mastic cracked and failed causing leaks at the transitions.

Solution

Clean entire area, apply Karna-Flex in a 3-course repair application with 5540 Resat Mat at metal transitions.

Benefits

Karna-Flex is very elastic and cures to a waterproofing membrane that will provide an excellent long term repair.

502MS Karna-Flex

Rubberized Elastomeric Sealant

Problem

Aged PVC membrane sustained a thermal split causing a major leak.

Solution

Apply Karna-Flex in a 3-course repair application with 3036 Poly Mat as reinforcement along the seam or affected areas.

Benefits

Karna-Flex is solvent borne and has excellent adhesion to aged single-ply membranes that are difficult to repair.

Note: Surface preparation for single-ply membranes include scrubbing with a weathered membrane cleaner suitable for that particular type of membrane.

Problem

Structural metal roof horizontal seams leaking or wicking moisture.

Solution

Apply Karna-Flex in a 3-course repair application with 5540 Resat Mat as reinforcement.

Benefits

Karna-Flex cures to a very elastic waterproofing membrane preventing any moisture from entering the horizontal seams.

502MS Karna-Flex

Rubberized Elastomeric Sealant

Problem

Curb flashing on metal roof leaking at juncture of curb flange.

Solution

Apply Karna-Flex in a 3-course repair application with 5540 Resat Mat as reinforcement.

Benefits

Karna-Flex has excellent elongation and will adhere to metal surfaces making this product ideal for long-term repairs on metal roofs. Karna-Flex also has superior resistance to ponding water for performance behind rooftop units that hold moisture.

502MS Karna-Flex

Rubberized Elastomeric Sealant

Problem

Aged PVC membrane flashing cracked on the corners of base flashing.

Solution

Apply Karna-Flex by brush to all surface cracks and checks.

Benefits

Karna-Flex will waterproof and seal preventing moisture from entering the roofing membrane. Aged PVC is very difficult to repair even with like materials. Karna-Flex is an ideal repair solution for aged PVC membranes.

Other problem-solving uses of Karna-Flex include:

- Excellent tie in flashing between metal and aged single-ply when reinforced with 5540 Resat Mat
- Repair mastic for fixing splits in skylights and skylight flashings
- Sealant for metal seams in HVAC duct work
- Waterproofing for exposed wood
- Ideal as a repair mastic for sprayed-in-place foam and cementitious foam coatings

Compatible Reflective Coatings

502 RC-W Self-Priming Base Coat
502 RC-W Elasto-Kote
298 Alumin-R

Compatible Reinforcing Fabrics

5540 Resat-Mat
3036 Poly-Mat

502MS Karna-Flex

Rubberized Elastomeric Sealant

Available in
30-oz. caulk cartridges
1-gallon cans
3-gallon buckets
