

Driwall™ Weep Screed

Driwall™ Weep Screed is a flashing & weep designed to be used with a water-resistive barrier or building paper & Driwall™ Rainscreen.

It provides a clean termination for stucco, manufactured stone & thin natural stone at the bottom of the wall.

Unique “V”-shape allows migration of moisture down the screed & away from the wall.

This product is required by all major building codes & the International Building Code at the bottom of all framed walls.

Features

- ✓ 3 ½-Inch (89-mm) nailing & flashing flange
- ✓ Color: gray, tan & white
- ✓ ¾-Inch (19 mm) “V”-shaped drip edge
- ✓ Each piece is 60” long (1.524 m)
- ✓ PVC material meets ASTM standards D1784, C1063 & D4216-99

Installation

Install Driwall™ Weep Screed on frame construction where stucco, manufactured stone or thin natural stone & foundation wall meet.

Water-Resistive Barrier (WRB) or building paper must cover the top portion of the Driwall™ Weep Screed up to the drip edge.

This product should be used where specified by the architect & installed per industry standards & according to local code.

Caulk all butt joints, intersections & ends.

Driwall™ Rainscreen

Driwall™ Rainscreen is a drainage mat for exterior wall systems. The entangled net product eliminates incidental moisture problems in most siding applications including stucco, manufactured stone, plank siding & vinyl.

The full wall Driwall™ Rainscreen product rolls over the water-resistive barrier to separate it from the siding. The airspace that Driwall™ Rainscreen creates increases airflow through the wall cavity, allowing the wall to breath & stay dry.

Driwall™ Protection Board

Driwall™ Protection Board is a waterproofing protection & drainage mat that is used after applying the waterproofing membrane to exterior foundation walls to prevent damage when backfilling. Driwall™ Protection Board provides drainage around foundations while eliminating the need for expensive, clean free draining backfill.
