ViperVent™ Nail-And-Go

A Rigid Stick Ridge Vent for a Durable Roof

Description

ViperVent™ Nail-And-Go by Keene Building Products is a durable, high-performance extruded ridge vent system built for fast installation and long-term reliability. It is available in two configurations with 12 or 18 square inches of Net Free Vent Area (NFVA) per linear foot to meet various ventilation requirements.

Molded from a rigid polymer, this vent delivers consistent airflow and a sleek, uniform appearance. The 13.5" width and 4' stick format allow for quick layout and installation. Built-in nailing pockets ensure compatibility with any standard nail gun, speeding up the process while improving accuracy. An external baffle helps deflect weather and debris while enhancing overall performance in high-wind or storm-prone environments.

ViperVent™ Nail-And-Go is also engineered with subtle end projections that accommodate expansion and contraction, helping maintain its placement and profile over time. Lightweight yet structurally sound, it's a dependable solution for asphalt shingle, wood shake, slate, tile, and metal roofing systems.
