MECHANICAL INSULATOR:

Central Indiana Insulation,
Indianapolis, IN

Project

For construction of its new MPH Medical Center in Shelbyville, Ind., the Major Hospital Foundation and project team incorporated a number of sustainable and highly efficient insulation products from Knauf Insulation North America. The new, 400,000-square-foot hospital was designed to emphasize preventative medicine and foster synergies across the health system's providers through innovative technology and establishing a central location. Knauf's extensive line of products was a perfect fit for the project, and complemented the company's commitment to healthy living. Due to their tremendous involvement, Mr. Thies Knauf and the Shelbyville-based insulation company will be listed as the "Main Concourse Lobby Benefactor."

Product

EcoBatt® Insulation
Earthwool® 1000° Pipe Insulation
Atmosphere™ Duct Wrap
