# Reshaping the Future of Insulation.

The science of construction is changing, and Knauf Insulation is on the forefront of advancing comfort and energy-efficiency. JetSpray™ Thermal Insulation is designed to provide the utmost thermal and acoustic comfort. It's one of our many innovations toward making lives better, homes more relaxing, and buildings more efficient.

# Maximize Your Home's Performance

## Thermal Performance

Because JetSpray™ fills every gap and cavity, it provides excellent thermal resistance from extreme temperature swings—keeping your home comfortable and cozy.

## Acoustic Performance

Due to its custom cavity fill, JetSpray acts as a sound dampener, keeping road noise and loud neighbors outside, and keeping your home comfortably quiet.

## Energy-Efficiency

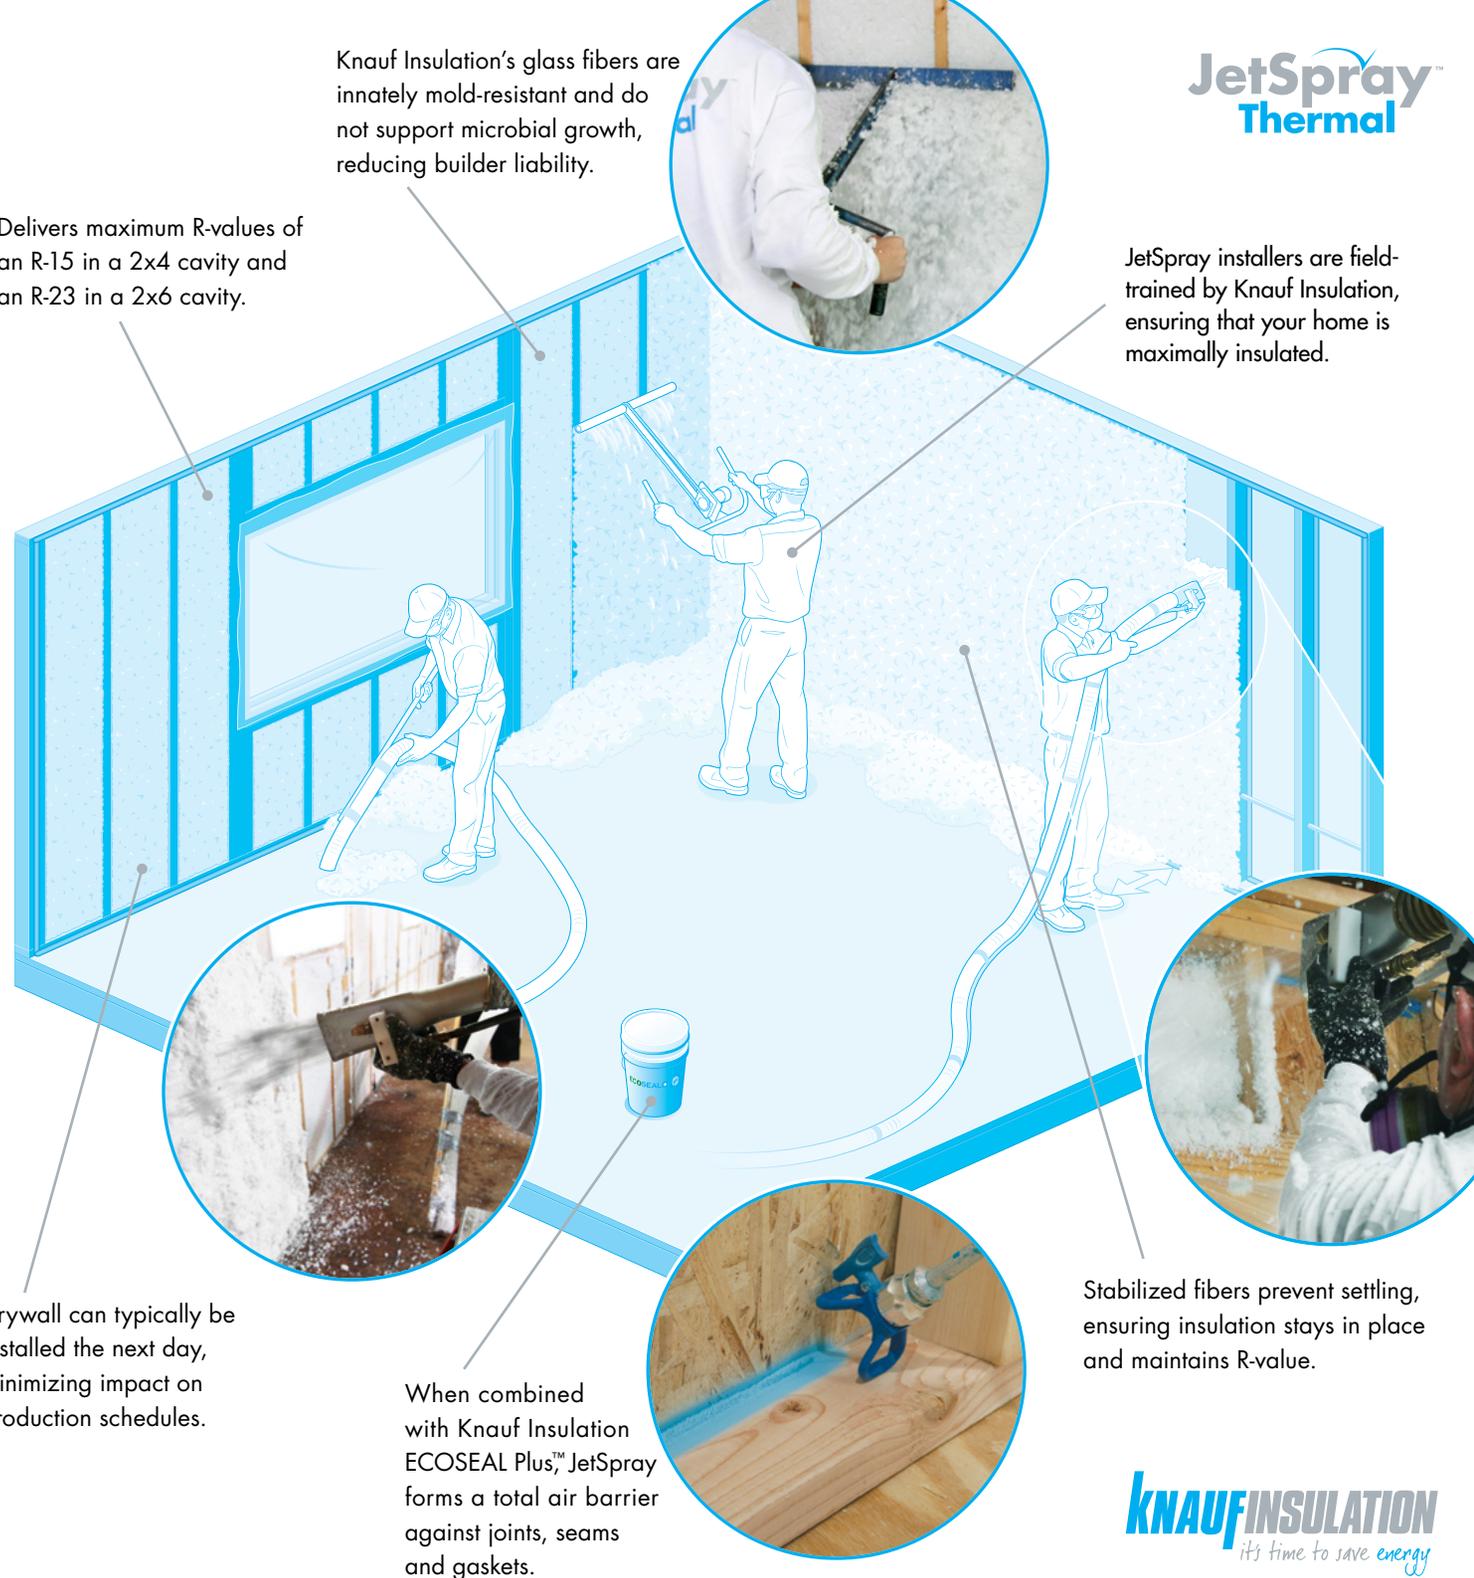

Unlike other insulation solutions, JetSpray's excess material is reworked back into the installation process, creating minimal waste and a greener home.

Delivers maximum R-values of an R-15 in a 2x4 cavity and an R-23 in a 2x6 cavity.

Knauf Insulation's glass fibers are innately mold-resistant and do not support microbial growth, reducing builder liability.

**JetSpray™**  
Thermal

JetSpray installers are field-trained by Knauf Insulation, ensuring that your home is maximally insulated.

Drywall can typically be installed the next day, minimizing impact on production schedules.

When combined with Knauf Insulation ECOSEAL Plus™, JetSpray forms a total air barrier against joints, seams and gaskets.

Stabilized fibers prevent settling, ensuring insulation stays in place and maintains R-value.

## **KNAUF INSULATION: FOCUSED ON THE FUTURE OF BUILDING.**

Since Knauf Insulation division was founded in 1978, we have pushed the science of building forward. We create innovative insulation solutions to make dwellings more comfortable, while making construction more efficient. With worldwide operations, Knauf Insulation is a preferred brand among professional builders and contractors due to our high quality and technical expertise—and because our products are odorless, soft to the touch, less dusty, and made in the USA.
