

# Concrete Resurfacing

April, 2008

## First, Determine the Extent of the Defect for Any Repairs

1. Repair only the current distress, and monitor for future distress.
2. Repair current distress, and fix all locations likely to suffer similar distress.
3. Add new system to the existing one, making failed system obsolete, but leaving in place.
4. Remove the failed system and replace it with a new one.

## Then, Determine the Appropriate Product for Repair

LAMBERT PRODUCT	PROPERTIES				
	# of Parts	Comp. Strength (psi)	Application Thickness Limitations	Initial Set Time (min.)	Notes
Lambco Fast Patch	1	5,000	¼" to 4"	5 to 15	Vertical & overhead applications
