

SUPERSTRUCT®

OSB FURNITURE PANELS

Developed Specifically For The Furniture Panel Industry

LP® SuperStruct® Furniture Panels are engineered specifically with the upholstered furniture industry in mind. Made from OSB technology, our product is free of core voids, knotholes and defects. Plus, every panel is consistently flat so you won't have to worry about warping, buckling and splitting.

Increase Productivity With A Product Engineered For Consistency

Since every LP SuperStruct panel is uniform, you won't have to cull out unusable parts. That helps you maximize productivity with less wasted time and materials. LP SuperStruct panels offer a consistent quality at a price lower than other materials. This often provides a more optimal solution than plywood for many furniture applications.

Application-Driven Solutions

No two furniture designs, components, or assembly processes are exactly the same. That's why LP works with you one-on-one to help determine your particular requirements and provide the LP SuperStruct Furniture Panel solution that's best for your application.
