

**REDUCES AIR LEAKS UP TO
87% BETTER THAN HOUSEWRAP***

**CAN SAVE UP TO ONE HOUR
OF INSTALLATION TIME IN
COMPARISON TO HOUSEWRAP****

ELEVATE MOISTURE MANAGEMENT

LP WeatherLogic® Air & Water Barrier is an integrated wall and roof sheathing system that combines both air and water protection with the increased structural capacity of a Structural I rating. The vapor-permeable membrane on the panel also allows moisture to dry.

- Roof and wall applications
- Available in 4-foot nominal widths and 8-, 9-, or 10-foot nominal lengths
- Seam & Flashing tape is available in 3.75-inch and 6-inch widths; squeegees offer ease of installation and come with every box
- 30-Year Limited Warranty is one of the longest in the industry
- Recognized as carbon negative by ASTM in 2023
- 50-Year Limited Warranty when used with LP® SmartSide® Siding & Trim

*Results of this testing commissioned by Louisiana-Pacific Corporation are based on single-point positive pressurization air leakage testing using a Minneapolis Blower Door™ at 50 Pa test pressure; the LP WeatherLogic® System and house wrap were separately installed and tested with tape applied to seams and around window/doors; no tape or sealant was applied at the bottom sill to slab transition for both products. Results may vary and may not be indicative of actual field performance.

**Results of this testing commissioned by Louisiana-Pacific Corporation are based on a 24' x 18' wood frame structure with three window openings, a doorway and a small shed roof bump-out. The total sheathing area installed was 861 square feet. Results may vary and may not be indicative of actual field performance.
