

# StudRite®

**TECHNICAL GUIDE**

**MARINO WARE®**

**Marino\WARE™ is proud to present this catalog detailing the StudRite™ Steel Framing System. StudRite is a product of the FrameRite™ family of proprietary framing solutions. For over 70 years, Marino\WARE has been providing their customers with top quality steel framing products.**

### ***At Marino\WARE Quality and Service Count.***

Marino\WARE is committed to customer satisfaction. This starts with QUALITY. Marino\WARE products are manufactured from quality steel and precision formed to meet or exceed industry standards established by the ASTM and the AISI.

Marino\WARE prides itself on providing the fastest delivery and finest service in the steel framing industry. Most steel framing manufacturers speak of lead times and deliveries in terms of weeks. Marino\WARE with its own fleet of trucks, 3 shift operation, latest technologies in roll forming capabilities and commitment to service excellence, in most cases provides next day delivery. Marino\WARE stands prepared to exceed your expectations. Steel framing products, competitive prices, excellent service along with timely deliveries and technical assistance are available to you.

## **DesignGroup™**

DesignGroup Engineering Services are available for all FrameRite Building System structures as well as conventional cold formed steel products. This includes answering technical calls regarding products and installation applications, as well as providing professionally engineered shop drawings. To speak to someone in our DesignGroup Engineering Office, please call 1-866-545-1545.

Product Details .....	7-8

One of the greatest attributes of the large triangular cutouts is the increased efficiencies for trade installation. Now for the first time, electricians, plumbers and HVAC installers can run their products right through the knockouts without cutting a single stud member. This technology has never been available before. Ordinarily a lot of time is wasted in cutting and reinforcing holes that have to be drilled or cut into steel wall studs. This new technology saves construction professionals valuable time and reduces labor costs. StudRite is an ideal framing product for assisted living facilities, medical complexes, hospitals, single and multiple family homes and apartment buildings.

### Design Flexibility

Architects, engineers and builders have the option to use stick or panel construction, or a combination of both. With StudRite almost any structural design is possible. StudRite is supplied in a complete range of sizes to meet engineering specifications for exterior wind-bearing walls or interior/exterior load-bearing walls and roof trusses. It is strong enough to support up to seven stories as a self-supporting load-bearing structure and can be utilized in much higher structures when used as an infill application. StudRite can be supplied in precision lengths from the factory, saving time on the jobsite. The factory can even add solid sections anywhere along the length of the stud if desired.

## SUPERIOR ENGINEERED WALL SECTION

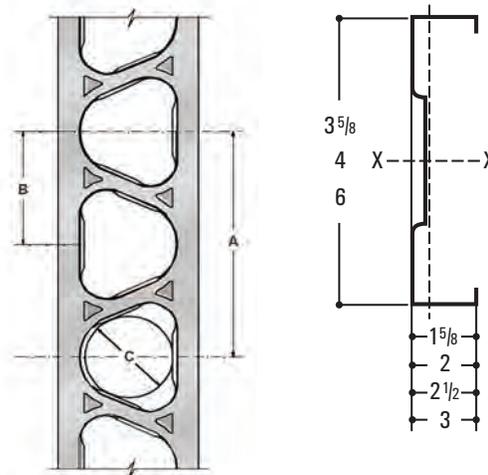

The StudRite Wall System is a specially designed cold formed steel C-stud that has one of the best strength-to-mass ratios of any stud in the industry. It can be used to frame interior bearing and non-bearing walls, as well as the exterior walls without any limitations. Exterior applications include low rise bearing and high rise non-bearing. StudRite is also ideal for companies that build pre-fabricated wall panels. StudRite significantly reduces the weight of pre-fabricated wall panels due to the large repetitive triangular cutouts. This technology reduces the weight of the stud significantly.

### Triangular Cutout Technology

The StudRite Wall System achieves maximum structural performance due to its lip reinforced repetitive triangular cutouts and embossments. Additionally, the open web design and the shape of the lip in the cutout make StudRite easier and safer to handle.

### Hole Sizes:

Section Depth in.	A Pitch in.	B 1/2 Pitch in.	C Max. Diameter in.
3 5/8	7.0	3.5	1 3/4
4	7.0	3.5	1 3/4
6	8.1	4.0	2 7/8

### Steel Thickness:

Product		Design		Minimum		ASTM C955 Color Code
Gauge	Mils	(in.)	(mm)	(in.)	(mm)	
20	33	0.0346	0.879	0.0329	0.838	White
18	43	0.0451	1.15	0.0428	1.09	Yellow
16	54	0.0566	1.44	0.0538	1.37	Green

### Finish:

StudRite will not swell, warp, burn, rot, attract or support insect (termite) infestations and mold growth. In accordance with ASTM C955 products are furnished with a G-60 hot-dipped galvanized coating to protect against time-dependent deterioration caused by moisture.

### Available Grades of Steel:

- 20, 18 gauge Stud:  $F_y = 33$  ksi  
(16 gauge is:  $F_y = 50$  ksi)

### Lengths:

Precut stud lengths are stocked, while custom length sizes are available upon request. Shorter lengths may be cut in the field.

## PHYSICAL AND STRUCTURAL PROPERTIES

The StudRite product has undergone rigorous development and testing to assure strength, durability and conductivity for superior performance.

### StudRite Identification System

Below is a color coded example of the FrameRite Product Identification System. Blue being the member width in 1/100 inches, Red denotes the product style or type, yellow being flange width in 1/100 inches, and black indicates material thickness in mils.

**600-JR-200-54**

- **Member Width 6" = 600 x 1/100 in.**
- **Style: JR = StudRite**
- **Flange Width: 2" = 2.00" = 200x1/100 in.**
- **Material Thickness: Minimum Base Metal Thickness: 0.054 in. = 54 mils (1 mil = 1/1000 in.) Minimum thickness represents 95% of the design thickness.**

## UL Fire Test Data

UL V457 1 and 2 Hour Fire Rating

### Symbols & Definitions

- $F_y$  ..... Yield point of steel used for design.
- $I_x$  ..... Moment of inertia of net section about x-axis.
- $S_x$  ..... Section modulus of net section about x-axis.
- $r_x$  ..... Radius of gyration of net section about x-axis.
- $I_y$  ..... Moment of inertia of net section about y-axis.
- $r_y$  ..... Radius of gyration of net section about y-axis.
- $I_{xed}$  ..... Effective moment of inertia of net section about x-axis based on a stress of  $0.6F_y$  (deflection determination).
- $S_{xe}$  ..... Effective section modulus of net section about x-axis based on a stress of  $F_y$  (strength determination).
- $M_a$  ..... Allowable bending moment.
- $V_a$  ..... Allowable shear force.
- $J$  ..... Saint-Venant torsion constant of net section.
- $C_w$  ..... Torsional warping constant of net section.
- $r_o$  ..... Polar radius of gyration of net section about shear center.

- Lateral loads multiplied by 0.70 for deflection determination except for 5 & 10 psf
- Check end reactions for web crippling.
- Limiting heights based on continuous support of each flange over the full height of the stud.
- Heights based on steel properties only.

- Lateral loads multiplied by 0.70 for deflection determination except for 5 & 10 psf
- Check end reactions for web crippling.
- Limiting heights based on continuous support of each flange over the full height of the stud.
- Heights based on steel properties only.

**1 STUD BRACING**  
CR CHANNEL WITH BRC CLIP

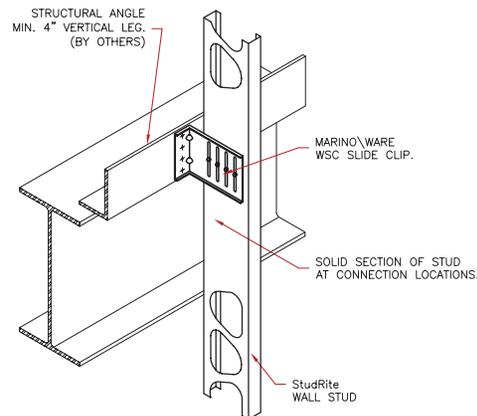

**2 STUD BRACING**  
STRAP AND SOLID BLOCKING FOR 6" AND WIDER STUDS ONLY

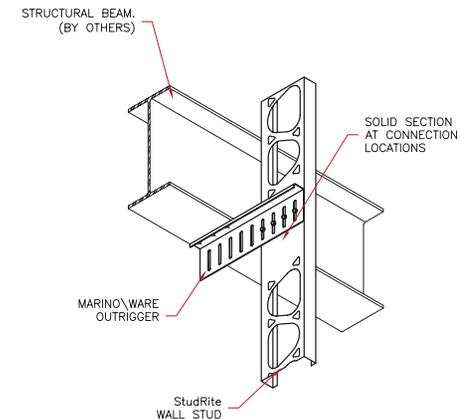

**3 STUD TO TRACK DETAIL**  
ANCHORAGE TO STRUCTURE

**4 DEFLECTION TRACK**  
CURTAIN WALL STUD WITH LATERAL BRACING

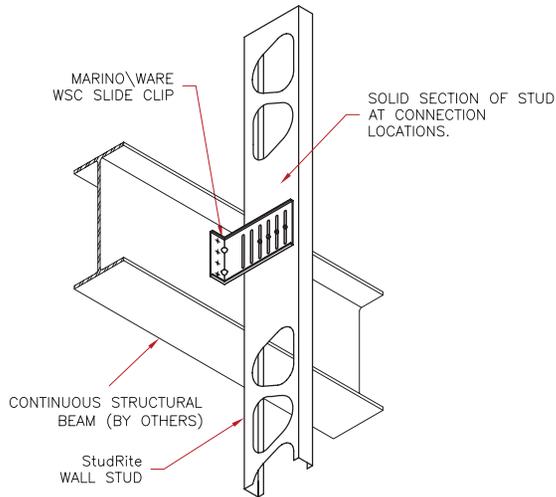

**5 STUD ATTACHMENT**  
CURTAINWALL BY-PASS CONDITION USING MARINO WARE WSC SLIDE CLIP

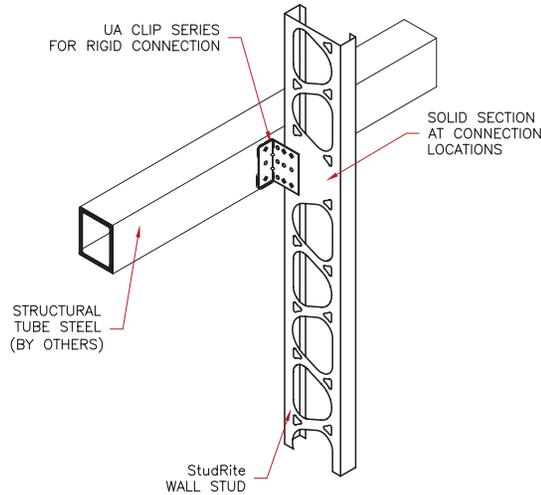

**6 STUD ATTACHMENT**  
CURTAINWALL BY-PASS CONDITION USING MARINO WARE OUTRIGGER

Note: The typical details shown above are for illustrative purposes only and should not be used without the approval of a competent design professional.

**7 STUD ATTACHMENT**  
WSC TO NON-LOAD BEARING STUD  
CLIP ATTACH TO STUD WITH SUPPORT STUD

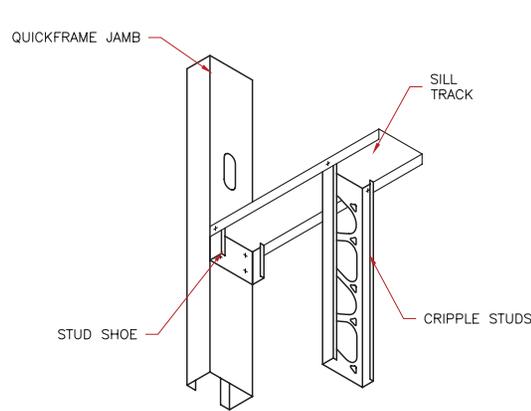

**8 STUD ATTACHMENT**  
CLIP ANGLE WELDED TO STRUCTURE ANGLE  
AND SCREW ATTACHED TO STUD

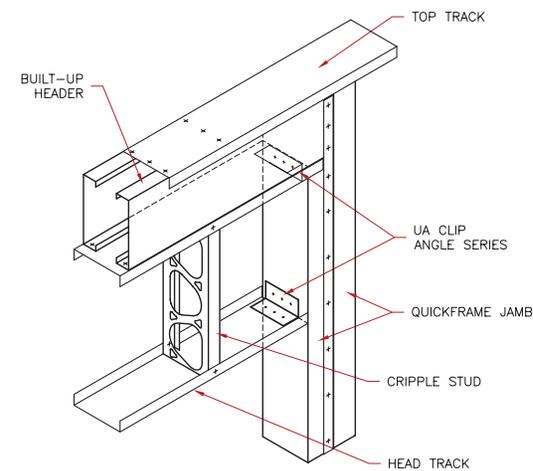

**9 STUD TRACK ANCHORAGE**

**10 LAY-IN HEADER DETAIL**  
NON-LOAD BEARING CURTAIN WALL HEADER

**11 SILL CONNECTION**  
CONNECTION OF SILL TO QUICK FRAME SYSTEM

**12 BOXED HEADER CONNECTION**  
LOAD BEARING HEADER - TWO MEMBER BOXED

Note: The typical details shown above are for illustrative purposes only and should not be used without the approval of a competent design professional.

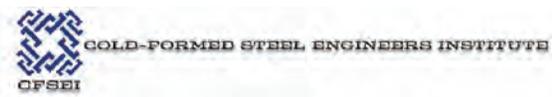

- Unique triangular cutouts within the product design allow plumbing, heating, electrical and other conduits to pass through easily – saving time and labor.
- Lightweight and durable, the product can be used as bearing walls in low-rise construction and as non-bearing walls in high-rise construction.
- Steel members are straight and true, equating to cleaner, straighter lines within the structure.
- UL classified assemblies. Please visit [www.marinoware.com](http://www.marinoware.com) for more information

## Industry Affiliations & Associations

MarinoWARE is proud to be involved with the following associations:

## Warranty & Limitations

All products presented herein are warranted to the buyer to be free from defects in material and workmanship.

The foregoing warranty is non-assignable and in lieu of and excludes all other warranties not expressly set forth herein, whether express or implied by operation of law or otherwise, including but not limited to any implied warranties of merchantability or fitness for a particular purpose. All details and specifications presented herein are intended as a general guide for the use of MarinoWARE framing systems. These products should not be used without evaluation by a qualified engineer or architect to determine their suitability for a specific use. MarinoWARE assumes no responsibility for failure resulting from use of its details or specifications, or for failure resulting from improper application or installation of these products.

## Governing Law

All issues arising in connection with your order and all transactions associated with it shall be interpreted according to the laws of the State of New Jersey, and all actions or other proceedings arising out of such issues shall be brought only in Superior Court, State of New Jersey, County of Essex, or United States District Court for the District of New Jersey. No action may be brought more than one year after accrual of the cause of action therefore.
