END CAP/RETURN

Installation

Handrail System: Lay out the handrail system on the wall marking the location of handrail standoffs. Attach the standoffs to the wall. Cut aluminum to desired length, attach returns or corners to the aluminum, attach aluminum to the standoffs, then cut cover, accent strip, handgrip, and impact absorbers to desired length and snap onto the aluminum. When a splice occurs, splice the aluminum retainer and the vinyl cover at different locations along the run. The use of back-up channels at stud wall conditions is recommended. For more detailed installation instructions, refer to the Marlite installation guide for this product.
