# **Submittal Data – Structural Track**

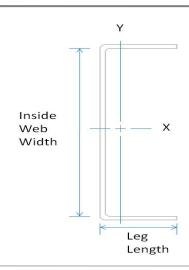

Member Designator 600T300-43

Coating CP60

**Physical Properties** 

Design Thickness 0.0451 in Mil 43 mil Gauge 18 Gauge Inside Web Width 6.00 in Leg Length 3.00 in Yield Strength 33 ksi

Note: Flange width-to-thickness ratio exceeds 60. Effective section properties not calculated.

## **Gross Properties**

| Gross Properties   |         |                    |                    |       |                    |       |  |  |
|--------------------|---------|--------------------|--------------------|-------|--------------------|-------|--|--|
| Area               | Weight  | lx                 | Sx                 | Rx    | ly                 | Ry    |  |  |
| (in <sup>2</sup> ) | (lb/ft) | (in <sup>4</sup> ) | (in <sup>3</sup> ) | (in)  | (in <sup>4</sup> ) | (in)  |  |  |
| 0.541              | 1.84    | 3.337              | 1.083              | 2.484 | 0.498              | 0.960 |  |  |

## **Torsional Properties**

| Torsional          |                    |        |       |       |       |  |  |  |  |
|--------------------|--------------------|--------|-------|-------|-------|--|--|--|--|
| J <sup>x1000</sup> | Cw                 | Хо     | m     | Ro    | β     |  |  |  |  |
| (in <sup>4</sup> ) | (in <sup>6</sup> ) | (in)   | (in)  | (in)  |       |  |  |  |  |
| 0.367              | 3.275              | -1.848 | 1.109 | 3.242 | 0.675 |  |  |  |  |

#### **General Notes**

- 1. Physical properties and load tables have been calculated in conformance with the 2001 NASPEC for the Design of Cold-Formed Steel Structural Members, including the 2004 Supplement, and the IBC 2006, unless noted otherwise.
- 2. Drywall framing members have a protective coating conforming to ASTM spec A 653/A 653M, G-40 min, or equivalent corrosion resistance.
- 3. Reference ASTM specification A 1003/A 1003 M table 1 for the universe of allowable coatings for light gauge steel framing.
- 4. Drywall framing members are marked with product information per the requirements of ASTM C 645 section 14.
- 5. All delivered material must be kept dry, preferably by being stored inside a building under a roof. If it is necessary to store material outside, it must be stacked off the ground, properly supported on a level platform, and fully protected from the weather. Reference ASTM C 754 section 8 and ASTM C 1007 section 4.
- 6. Drywall framing [nonstructural 25 gauge, 22 gauge and 20 gauge] is not permitted in load bearing (i.e. axial load greater than 200 lbs.) or exterior applications (i.e. transverse load greater than 10 PSF). Reference ASTM C 645 section 3.2.2.

#### **LEED Green Building Credits**

MR Credit 2: Construction Waste Management – MBA steel framing is 100% recyclable.

MR Credit 4: Recycled Content – MBA steel framing is formed from no less than 25.5% post-consumer and 6.8% pre-consumer recycled content.

MR Credit 5: Regional Materials – MBA has manufacturing facilities in multiple states.
