

BUILD WITH IMPACT™

Cold-Formed Bolt-up Steel Building Solutions

Features:

- ▷ All galvanized (G90) steel frame members
- ▷ Cast in place, anchor bolts not required
- ▷ Easy to assemble without heavy equipment
- ▷ Full or partial mezzanine floor for storage or living
- ▷ Bolt/screw together components, no welding required
- ▷ More economical foundation (Up to 25% less concrete than traditional metal buildings)

Unique Benefits:

- ▷ Non-combustible and insect resistant
- ▷ Fully engineered/stamped plans for local building codes
- ▷ Faster installation saves time and money
- ▷ Clear span with no posts
- ▷ Lean-to attachments and/or interior partition walls
- ▷ Entry doors, garage doors, windows and other accessories
- ▷ Spans from 12' to 80' clear or 120' posted by any length (Maximum width based on snow, wind and exposure)

MS Metal Sales™

Multiple Building Styles

Mean Endless Possibilities

Impact Steel Buildings are pre-engineered with you, the building owner or do-it-yourself customer in mind.

Engineered utilizing clear span technology, interior space is maximized from floor to ceiling by eliminating typical protruding truss members. We'll even provide you with a set of concrete foundation drawings that are specific to your building.

Using our accurate, yet simple bolt-together technique, installation is quick, efficient and economical.

Uses...

- ▶ Garages ▶ Showrooms ▶ Offices ▶ Cabins
- ▶ Barns ▶ Storage Buildings ▶ Stables ▶ Utility Buildings
