Painted both sides available in commercial aluminum only.

W-VALLEY

W-Valley flashing is a beneficial component of many residential roof applications. The center crimp of a Metal Sales valley flashing helps relieve stress so that the metal does not buckle or crack, providing long-lasting strength at a critical point while effectively channeling rainwater. Hems and beads can also be added to increase strength and safety while handling the W-Valley prior to and during application.

W-VALLEY

Skid Packaged, 50 piece minimum.

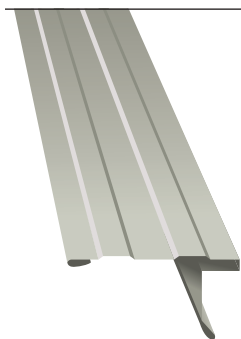

ROOF EDGE

Metal Sales roof edge flashing helps channel water away from the roof edge, offering protection from leaking and pooling. When water is present from rain, snow, or ice, roof edge ensures that water does not penetrate rafter rails, insulation, fascia, or soffits. Available in steel or aluminum in a variety of colors and styles, Metal Sales has the appropriate roof edge for any application.
