DECK WRAP™

Self-adhering Protective Wrap

- Protects Against Premature Rot and Degradation
- Suitable For Use With Treated, Untreated and Synthetic Woods
- Stops Corrosion of Metal Components In Contact With ACQ-Treated Lumber
- Perfect For Ledgers, Joists and Post Applications
- Quick & Easy Self-Stick Installation

■ How DECKWRAP works:

MFM DECKWRAP™ is a tough, self-adhering, waterproof membrane specifically engineered to protect every deck from premature rot and degradation. Suitable for use with treated, untreated and synthetic woods, **DECKWRAP** will add years to the service life of every deck!

DECKWRAP protects the wood surface with a layer of specialized asphalt

bonded to a durable film. This creates an effective waterproof barrier preventing moisture, damp soil, concrete or metal from coming into direct contact with the wood which leads to premature rot. The specially formulated adhesive on **DECKWRAP** also self-seals around nails, screws and staples to prevent moisture and fungi from attacking the wood, too.

The ORIGINAL, self-sealing, self-adhering, waterproof membrane providing EXTREME PROTECTION. Designed to add years to the life of every deck.

■ **DECKWRAP** is easy to use:

DECKWRAP makes for a quick, easy installation – by either the professional builder or DIYer – on key decking components. Simply measure the amount required for the location to be protected... cut to length... press into place... burnish with a hand roller... and the job is done! **DECKWRAP** is also available in three

convenient widths – 3-, 6- and 12-inches – for a variety of applications. Far superior to similar products because of its composition and unique construction, **DECKWRAP** is the “must use” product to significantly extend the life of every deck.

■ Where to use DECKWRAP:

■ Use **DECKWRAP** to protect posts from moisture and fungi attack! Perfect for every method: in-ground, on a concrete pad, or when attached to a metal bracket.

■ **DECKWRAP** is ideal as the flashing to protect the deck ledger board. In addition to protecting this important deck component, it prevents moisture from entering behind the mounted ledger board and the structure wall where water can accumulate.

■ ACQ-treated lumber causes most metal components to corrode, however,

Joist Ends...

DECK-WRAP

eliminates this problem as the protective barrier between the wood, metal joist hangers, and the support beam brackets.

■ Prior to installing the deck surface, use **DECK-WRAP** on the top edge of all the joists. It creates a permanent moisture barrier in an area where water is prone to accumulate, and will prevent premature rot from taking place.

...and Top Edges!

MFM DECKWRAP™ Self-adhering Protective Wrap:

Count on its **EXTREME Elemental Protection** to safeguard and protect this costly investment... and add years to the service life and enjoyment of every deck!

DECKWRAP			
Width	Length	Color	Thickness
3"	25'	Black	25 mils
6"	25'	Black	25 mils
12"	25'	Black	25 mils

3-inch (two rolls per pack)

■ The ideal size for protection of joist ends where metal brackets and hangers are installed creating a barrier between the wood and metal surfaces... and corrosion from ACQ-treated lumber. The perfect size for use as a general purpose sealing tape, too!

6-inch

■ Sized for use on the top edge and side overlaps on all joists. Applied to this area of these critical components, it protects from rot and premature decay where water is prone to collect.

12-inch

■ The perfect solution for protecting the exterior surface of the ledger board and accumulation of water behind the vertical wall of the structure to which it is mounted. This is also a convenient size for wrapping of in-ground deck support posts.
