

ABS DWV FITTINGS FOR PLUMBING AND MECHANICAL APPLICATIONS

Job Name	Contractor
Job Location	Wholesaler
Engineer	Streamline[®] Rep

Product Description:

Streamline[®] ABS DWV fittings for use in applications including sanitary drain, waste, and vent (DWV), sewer, and general drainage applications. Available in sizes ranging from 1-1/4" to 6" in diameter; all fittings should be manufactured in the United States.

Material:

Acrylonitrile-butadiene-styrene (ABS) DWV fittings shall conform to cell class 3-2-2-2 as defined in ASTM 3965.

Key Specifications:

Streamline[®] ABS DWV fittings shall conform to ASTM D2661 and F1498. Third-party certifications shall be in place for fittings in compliance with NSF Standard 14. Fittings shall be certified to the Uniform Plumbing Code (UPC) where applicable.

Installation:

Installation shall comply with the latest applicable building codes for the local jurisdiction. Solvent cement connections shall be made using a two-step process consisting of primer (in conformance with ASTM F656) and solvent cement (in conformance with ASTM D2564). For detailed installation instructions, consult the Plumbing Apprentice Training Manual available from PPFA (Plastic Pipe & Fitting Association) at ppfahome.org.

ABS DWV fittings are not designed for hot water systems and discharge temperatures should not exceed 140°F. Systems shall be installed to avoid contact with thread sealants or other chemical agents which are not compatible with ABS. Hydrostatic testing of the system shall be completed prior to use.

Do not test or use Streamline[®] plastic products with compressed air or compressed gases.
