

PermaBASE™ Cement Board Screws

09 28 00 / NGC

Technical Information
800.NATIONAL • 800.628.4662

DESCRIPTION

PermaBASE™ Cement Board Screws are corrosion-resistant screws specifically designed to be used with PermaBASE® Cement Boards.

BASIC USES

Applications

Used to attach PermaBASE Cement Board and other approved tile backers to wood or steel studs, plywood subfloors, ceilings and countertops.

Advantages

- Self-drilling and self-tapping versions available.
- Used for interior and exterior applications.
- Large diameter, low profile wafer-type head for more secure attachment.
- Durable, corrosion-resistant coating.
- No ribs under head, preventing reinforcing mesh damage.
- Packaged in convenient jars and pails for jobsite durability.
- Available in 1-1/4 in., 2 in. and 2-1/2 in. lengths for optimal framing penetration.

INSTALLATION

- Drive screws to where screw-heads are flush with the panel surface. Do not countersink or overdrive screws.
- Screw must be driven straight for proper performance.
- Install screws 3/8 in. to 5/8 in. from edges of panels.
- Recommended screw spacing is 8 in. o.c. for walls, floors and countertops, and 6 in. o.c. for ceilings.
- Metal screws are designed to attach cement board to steel studs of 20 to 12 gauge.

TECHNICAL DATA

Property	Standard	Result
Coating type	N/A	Zinc plated with chemical coating
Recess	N/A	Philips #2
Thread/point (wood)	N/A	#10-16 / Hi-Lo
Thread/point (metal)	N/A	#8-18 / #10-18 / Type S-12
Head Diameter	N/A	0.45" (11.4 mm)
Salt Spray Resistance	ASTM B117 (0% rust)	1,000 hrs

Available Sizes			
Size	Length	Thread/Point	Quantities
Wood Screws			
#10-16	1-1/4"	Hi-Lo	700/Jar
#10-16	2"	Hi-Lo	2,000/Pail
#10-16	2-1/2"	Hi-Lo	2,000/Pail
Metal Screws			
#8-18	1-1/4"	Drill Point	700/Jar
#8-18	2"	Drill Point	2,000/Pail
#10-16	2-1/2"	Drill Point	1,500/Pail

Estimated Screw Requirements			
Board Size	Application	Screws per Board	Screws per Sq. Ft.
4'x8'	Wall	52	1.625
4'x8'	Ceiling	63	2
3'x5'	Wall	36	2.4
3'x5'	Floor	60	4
