

# Waler Bar

The AR Quick Strip Ty Waler Bar is used to secure the Quick Strip Tys and form panels in place. The Waler Bar overlaps the adjacent edge of the form ply to increase the wall stability when pouring concrete. The Waler Bars are 6 mm x 20 mm x 2,400 mm (1/4" x 3/4" x 8") and are made from high quality carbon steel with milled edges for smooth installation.

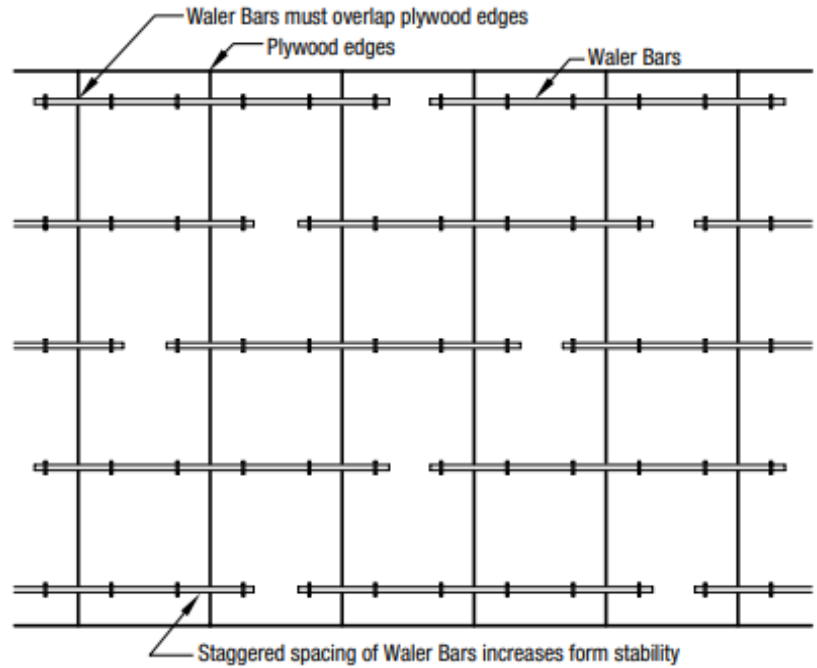

To order, please specify the following information

EXAMPLE

Name ..... Waler Bar

Quantity ..... 200

Refer to General Guidelines and Conditions on page 102 and Lateral Pressure Design Information beginning on page 102 of the Appendix.
