

Tyloop (2-Strut)

The AR Standard 2-Strut Tyloop (TL-2) is made of a single looped wire welded to a helix coil in 13 mm and 20 mm ($\frac{1}{2}$ " and $\frac{3}{4}$ ") nominal diameters. Suitable for light anchorage requirements or as emergency tie, tie down, corner tie, etc. Standard length is 100 mm (4") for 13 mm ($\frac{1}{2}$ ") diameter and 150 mm (6") for 20 mm ($\frac{3}{4}$ ") diameters. This unit may be fabricated in lengths to suit the job site requirements.

The AR Heavy 2-Strut Tyloop (TL-2-H) is made with heavier wire and are principally used as anchors for medium heavy construction. The standard length is 150 mm (6") for both 13mm ($\frac{1}{2}$ ") and 20 mm ($\frac{3}{4}$ ") diameter. The Tyloop can also be fabricated in longer lengths.
