chemical solutions to concrete problems

Remove graffiti from non-porous surfaces

**TAG
ERASE**
Graffiti Remover
for Non-Porous Surfaces

Read Product Data and Safety Data Sheets before using

BENEFITS

- ✓ Use on all types of smooth, non-porous surfaces to include reflective, vinyl signs, baked on painted metal, galvanized steel, trash bins, mail boxes, windows, metal flashing, truck trailers, truck van boxes, railroad cars, and bulk tankers, etc.
- ✓ For use on most non-porous surfaces where graffiti is more difficult to remove using conventional graffiti removers.
- ✓ Can be used as an effective alternative to presealing with sacrificial or permanent graffiti barrier coatings.
- ✓ Quickly and effectively removes lacquer, enamel, acrylic, vinyl, alkyd, oil and other synthetic resin based spray or brush applied graffiti.
- ✓ Fast acting formulation performs well at all temperatures - even below freezing.
- ✓ Biodegradable and safe for disposal in all municipal sewer treatment facilities.
- ✓ Does not contain any phenol, methylene chloride or other halogenated solvents.

USE FOR

- road signs • metal utility structures • bus shelters • benches
- bridge and rail signs • state and federal governmental structures
