To find out more about each line of our Architectural Series shingles, click on any of the products listed below:

WeatherGuard® 40 High Wind 110

Unsurpassed strength and durability to withstand winds up to 110 mph combined with rich color blends and deep double shadows that give the textured appearance of shake.

WeatherGuard® 40 AR High Wind 110

Unsurpassed strength and durability to withstand winds up to 110 mph combined with rich color blends and deep double shadows that give the textured appearance of shake.

WeatherGuard® PRO 40™ AR High Wind 110

The strength to withstand winds up to 110 mph combined with distinct color blends and shadow to create a soft textured dimension.

Oakridge® PRO 50™ Deep Shadow

Distinct color blends and a complementary double shadow create rich dimension resembling the natural and random textured look of shake.

Oakridge® PRO 40™ Shadow

Distinct color blends and a complementary shadow create a softly textured dimensional look.

Oakridge® PRO 30™

Muted color blends and a subtle single shadow provide an understated complement to exteriors.
