

## Industrial Specialty Asphalt

Unmatched quality, service and reliability.

Trumbull is the nation's largest manufacturer of industrial asphalt materials. We believe the reason for our success is that asphalt is all we've ever done – keeping us squarely focused on manufacturing and delivering asphalt better than anybody else.

We've had a hand in literally hundreds of asphalt-based products marketed across the globe. You'll find our expertise at work in:

- Drycell batteries
- Craft paper laminates
- Ballast transformers
- Printing ink
- Rust preventative products
- Water proofing compounds
- Tires
- Burial Vaults

In the true spirit of Applied Innovation™, our customers aren't relying on us to provide "stock" solutions. They bring us their desired performance requirements — from pliability to abrasion resistance to durability to chemical compatibility — and trust our experience and creativity to develop asphalt that precisely meets their specifications. And it's quality we double-check through repeated tests at each of our plant's on-site laboratories as well as rigorous testing at our AASHTO-certified Technical Laboratory in Summit, Illinois.

We also realize that the quality of our asphalt is irrelevant if it's not delivered on time. That's why we've developed a strategic network of plant locations including 19 asphalt producing plants, putting the vast majority of our customers within 200 miles from a plant.

Trumbull specialty asphalt products include:

- Culvert compounds, featuring our innovative TruFlow® polymerized asphalt coating.
- Mineral rubber and granulated asphalt
- Asphalt cutbacks
- Automotive saturants
- Pipe and piling coatings
- Base asphalts for industrial applications

Whatever your industrial asphalt need, Trumbull is uniquely positioned to deliver a product that meets or exceeds ASTM standards as well as state, local, federal and industry specifications. To get us started on your project, call us at 1-800-GET-PINK.
