

Starter Strip Shingle

Goes on right—right away

Starter Strip shingle from Owens Corning™ Roofing – eliminates the need for cutting shingle tabs to create a starter row, helping to save installation time and money! It's a component of the Owens Corning™ Total Protection Roofing System™^.

1. Starter Strip is packaged two pieces per shingle, 16 shingles per bundle, 105 lineal feet.
2. Perforation down the center allows for easy separation.
3. Once apart, the Starter Strip shingles should be aligned next to one another with the sealant toward the eave.

Starter Strip shingle advantages:

Speeds installation and helps improve safety.

Starter Strip shingle eliminates the need to cut off tabs or headlap.

Saves labor. It's easy for a single person to position Starter Strip shingle on the roof.

Maximum compatibility. Use with any shingle that has an exposure of up to 6".

Improves job quality. Puts the sealant appropriately at the eaves.

Cost savings. There's no need to cut down 3-tab shingles to use as a starter strip.

Clean look. Starter Strip shingle provides a straight edge at the eave and along the rake.

Exceptional bonding strength. Continuous sealant ensures an effective seal between the starter and the first course of shingles.

Convenient. One (1) bundle provides 1 square of material (105 lineal feet of actual coverage).

Application Instructions

Owens Corning™ Starter Strip can be used with any shingle that has an exposure of up to 6". Starter Strip shingles cannot be used with Owens Corning™ Berkshire®, Woodmoor®, Woodcrest®, or Devonshire™ shingles.

Installation of Starter Strip shingle

Starter Strip shingle is designed to be broken into two pieces, and each piece has its own sealant strip. When separated, each starter shingle is 6⁵/₈" x 39³/₈", and each bundle will cover approximately 105 lineal feet. See Fig. 1.

This starter can be used with shingles that have an exposure of no more than 6"; if the exposure is greater than 6", a full starter (13¹/₄" x 39³/₈") would be required. See Fig. 1.

1. Start first Starter Strip shingle with 6" removed from the rake edge and flush with the drip edge. Starter shingle can extend no greater than ³/₄" beyond the edge of the eave. Use 5 fasteners placed 2" to 3" from the edge of the eave. See Fig. 2.
2. During application, the installer must ensure that when the starter is applied, the overlying shingles' end joints do not line up with the starter end joints. End joints must be a minimum of 4" from the overlying shingle.
3. When the starter is used with 3-tab shingles, the installer must ensure that nails in the starter are not exposed between the cutouts of the overlying shingle.
4. When installing Owens Corning™ Oakridge® shingles for maximum wind warranty, Starter Strip shingles are required along both the eave and rake edge.

Product Specifications

Size	13 ¹ / ₄ " x 39 ³ / ₈ " (337 mm x 1000 mm)
Piece Size	6 ⁵ / ₈ " x 39 ³ / ₈ " (168 mm x 1000 mm)
Shingles per Bundle	16
Pieces per Bundle	32 (6 ⁵ / ₈ " x 39 ³ / ₈ " [168 mm x 1000 mm])
Lineal Feet per Bundle	Approximately 105 (32.0 m)

Applicable Standards and Codes

ASTM D3462
ASTM D3161 (Class F Wind Resistance)
ASTM E108/UL 790 (Class A Fire Resistance)*
Florida Product Approval (FL10674)
UL ER2453-01

* Starter Shingles are tested as part of a roof assembly that includes underlayment, wood decking, starter and asphalt roof shingles.
 ^ Excludes non-Owens Corning™ Roofing Products such as flashing, fasteners, and wood decking.

Caution

Roof surface may be slippery: Especially when wet or icy. Use a fall protection system when installing. Wear rubber-soled shoes. Walk with care.

Falling hazard: Secure area below work and materials on roof. Wear a hard hat.

Notice

It is important that attic space be properly ventilated to maintain product performance and to prevent damage from moisture condensation and excessively high attic temperatures. In this regard, FHA and National Building Code Minimum Property Standards must be met.
