

INNOVATIONS FOR LIVING®

Owens Corning™ Trumbull® Built-Up Roofing Asphalt

HELPING YOU ACHIEVE LEED® CERTIFICATION

Owens Corning™ *Trumbull* Asphalt products help composition and provide improved performance of roofing shingles and underlayments, built-up roofing (BUR) systems and roadway pavings.

LEED Certification and the awarding of credits, is based on the overall project design, properly designed building systems and construction assemblies, and the performance of the project as a whole.

Owens Corning™ *Trumbull* Asphalt Products can be components in many roofing systems and assemblies, with all components within those systems and assemblies considered to assess compliance with the LEED Rating System used for certification within a given category.

Owens Corning™ *Trumbull* Asphalt Products contribute to the categories listed below.

Owens Corning™ Trumbull® Built-Up Roofing Asphalt:

- TruLo® Asphalt
- Perma Mop® Asphalt
- Standard Asphalt
- Modified Asphalt

Table 1

Contribution to LEED Requirement

LEED Credit Category	LEED Requirement	Owens Corning™ Product Contribution
Materials & Resources (MR)– Credit 5: Regional Material (1-2 points)	Materials/products extracted and manufactured (or fraction thereof) within 500 miles of project site for a minimum of 10% (1 point) or 20% (2 points), based on cost, of the total materials value (fractional quantities contribute as percentage by weight).	Owens Corning™ <i>Trumbull</i> Asphalt products are made in many locations, providing regionally available product manufactured and sourced within a 500 mile radius of project locations in many areas of the country. Owens Corning™ Roofing plant locations are shown in Fig. 1. Contact 1-800-GET PINK® for additional information.
Innovation in Design (ID)– (1-4 points)	Credit can be achieved through any combination of the Innovation in Design and Exemplary Performance.	Refer to individual product data sheets or check with the local sales representative for product applications.

Note: No individual material enables a credit point to be taken within LEED because each category is dependent on the aggregate of all materials and their proportionate relationship to the total dollar cost of all materials.
