AquaSol™ Coating
Enhanced Acrylic Coating with Hydrophobic and Photocatalytic Properties

DESCRIPTION:
- 100% Acrylic-based coating available in textured or non-textured
- Hydrophobic; water repellent
- Self-cleaning
- Pollution reducing
- Long-term durability
- Photocatalytic; heat reflective

USES:
- A protective and decorative exterior coating over concrete, masonry, stucco, or acrylic-based textured finishes. Compatible with Parex USA finishes, may be applied over them
- To promote color uniformity of repaired and modified surfaces
- To color architectural details and graphics on any of the Parex USA Finishes and Coating.
- Recoating existing EIFS or Stucco

COMPOSITION:
- Binder Base: 100% Acrylic
- Color: White or tinted to desired color
- Meets SCAQMD Rule 1113 when using Parex USA Non-VOC Colorants
- Pigment based: Titanium dioxide
- Water base: VOC-Compliant

PROPERTIES:
- Appearance: Flat, non-gloss, smooth finish
- Vapor Permeability: Water vapor permeable. Does not create a vapor barrier
- Hydrophobic and Photocatalytic

*On going testing
Uneven concrete or masonry can be leveled with any Parex USA Base Coat & Adhesive or other suitable, compatible product.

Prime cementitious surfaces with any Parex USA Primer.

For application of specific Parex USA Primers refer to the Product Data Sheet.

For additional options, contact Parex USA Technical Support.

MIXING:
- Use clean equipment for mixing and preparation
- Stir AquaSol™ Coating to a uniform consistency.
- Avoid creating air bubbles or foam.
- Stir occasionally as needed to keep uniformly mixed.

APPLICATION:
- Read the entire label before using this product
- AquaSol™ Coating exhibit good surface coverage in single application.
- For most uncoated, unprimed surface of concrete, masonry, or drywall, two coats of the product may be required to obtain adequate hiding of the substrate and best performance.
- AquaSol™ Coating is easily applied with either brush, roller, or suitable spray equipment. Apply as packaged. If necessary, add a small amount of clean potable water: maximum 8 oz (0.25L) / pail. Multiple coats may be needed to achieve desired results. Rolling/brush applications on smooth or fine textured surfaces can cause orange peel texture.

LIMITATIONS:
- Ambient and surface temperatures must be 40ºF (4ºC) or higher during application and drying time. Provide supplemental heat and protection from precipitation as needed.
- Use only on surfaces that are sound, clean, dry, and free from any residue which may affect the ability of the AquaSol™ Coating to bond to the surface.
- Application in direct sunlight in hot weather may adversely affect aesthetics.

WARNING
- Read complete Warning information printed on product container prior to use. For medical emergency information, call 1-800-424-9300.
- For more information on handling this product refer to its Material Safety Data Sheet (MSDS). The most current MSDS and Product Data Sheet (PDS) can be found on our website.
- This Product Data Sheet has been prepared in good faith on the basis of information available at the time of publication. It is intended to provide users with information about the guidelines for the proper use and application of the covered product(s) under normal environmental and working conditions. Because each project is different, Parex USA, Inc. cannot be responsible for the consequences of variations in such conditions, or for unforeseen conditions.
