

INNOVATIONS IN ARCHITECTURAL WEATHERPROOFING

SINCE 1862

Since its founding in 1862 as a Philadelphia-based paint and varnish company, Pecora has developed and manufactured trusted solutions for a wide variety of building protection needs. Over the years, the company has leveraged its innovations to emerge as a premier manufacturer of architectural weatherproofing products in the USA.

Pecora means protection. Our high-quality sealants, air barriers, and traffic coatings protect your project, and our unmatched level of service protects your reputation. Our team is readily available to assist you in multiple ways. From on-site training sessions to finding the perfect products for your job at hand—with 99% on-time shipping—we strive to ensure your job comes in on time and on budget. We're Pecora and we're here to protect you and your project every step of the way.

SERVICE. PERFORMANCE. RESULTS.

HERE WHEN YOU NEED US

Service is instrumental to our 160 years of success. We deliver the quality products you expect with the service you deserve, in the time you need.

TECHNICAL RESOURCES

Selecting the correct weatherproofing product is crucial to a building project, and knowledge of substrates, surface treatments, and application designs are keys to a building's successful performance. Our goal is to reduce the complexity of your decision-making process while ensuring selection, procurement, and application of the best-performing products.

Pecora's Technical Service Department approaches problem-solving with an eye for solutions that are practical, as well as appropriate for the performance characteristics you require. Our team is highly qualified to recommend proper weatherproofing solutions and to perform compatibility, adhesion, and stain testing between Pecora's sealants and representative samples from your job site.

Our team also provides corporate sales support with on-site presentations and hands-on training with a primary focus on product technology and use. We provide any technical assistance you need—in either the planning or implementation stage—for your weatherproofing project.

CUSTOMER RESOURCES

Pecora's sales force and customer service team continually build strong relationships and deliver results—a few of the many aspects that set our business apart from the rest. Our sales representatives average over 20 years of technical expertise and are dedicated to providing the services you need. Whether it be assistance with project specifications, consultations at your job site, or helping you find the right product for the task at hand, our customer service representatives are reliable and consistent problem solvers.

COLOR MATCHING

Color matching can make all the difference in the appearance of your finished building project. Our color matching lab offers a wide variety of standard color options, but when an exact color match is needed, a custom color can be readily available within a short time after receiving your substrate sample. In addition, Pecora has already formulated thousands of colors to work with many leading manufacturers of architectural aluminum windows and Exterior Insulation Finish Systems (EIFS).

SEALANTS

WEATHERPROOFING SEALANTS

Our high-quality, non-staining silicones can be quickly and easily tinted at your job site, allowing for unprecedented flexibility in design, application, and inventory management. The same non-staining technology can be found in our single-component hybrid STPU (silyl terminated polyurethane) moisture cure non-yellowing sealant—or alternatively, try our multi-component and one-part urethane sealants. All of Pecora's silicones, hybrids and urethanes come in a range of standard colors.

GLAZING SEALANTS

Pecora offers a complete line of high-performance products for structural and non-structural glazing that are suitable for factory or field applications. Pecora's glazing solutions include products with high green strength, long-lasting bonds for a variety of substrates, and Pecora's industry-leading non-staining technology (NST).

TRAFFIC SEALANTS

Pecora offers a combination of self-leveling and slope-grading sealants that ensure proper sealing of traffic-bearing control joints, concrete, metal, or asphalt expansion joints, and other surfaces subject to heavy pedestrian or vehicular traffic.

ACOUSTIC SEALANTS

Pecora Acoustic Sealants control sound transmission when used in attenuated partition assemblies. Achieve specified STC values by sealing annular spaces and joints around partition edges.

SECURITY SEALANT SYSTEMS

Pecora's highly-specified Security Sealants include tamper-proof and tamper-resistant products in varying degrees of shore hardness. These sealants prevent idle tampering and vandalism for high-security areas such as prisons, courthouses, hospitals, daycares, and more.

FIRE-RATED SEALANTS

Pecora UL® Classified fire-rated sealants create fire-stopping systems for expansion joints and through-penetrations that, when properly installed, effectively contain fire, smoke, toxic fumes, and water for a 1-, 2-, 3-, or 4-hour period depending on the design specifications.

AIR BARRIERS

AIR, VAPOR, AND WATER RESISTIVE BARRIER

Pecora's Air, Vapor, and Water Resistive Barrier System consists of fully engineered and compatible products that work together to provide complete air, vapor, and weather barrier protection for your building envelope. These products can be used together as a system or independently.

TRAFFIC COATING SYSTEMS

Pecora offers superior-quality vehicular, pedestrian, and decorative traffic coating systems. Protect your client's investment from the effects of de-icing salts, airborne chlorides, and freeze-thaw conditions with Pecora-Deck's one-part or two-part, low-VOC, low-odor deck series. Each Pecora-Deck system offers you unparalleled flexibility of virtually any color with field-tintable top coat.

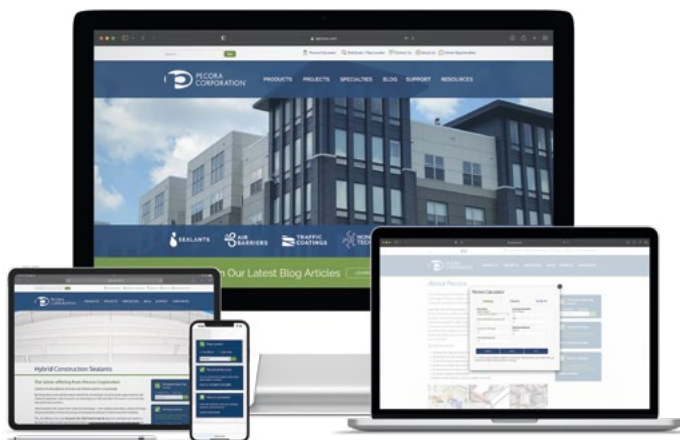

QUALITY AT YOUR FINGERTIPS

As an industry leader in innovation and product development, Pecora is committed to staying on the cutting edge of construction technology. Pecora offers a responsive website that allows for easy, intuitive navigation. Find product resources, including our data sheets, color charts, brochures, and technical bulletins, as well as contact information for local sales reps and distributors.

Streamline your submittal process by accessing our Submittals Made Easy page. With one easy click you will find the test documents, product warranties, and LEED information you need to complete your submittal package. Are you having trouble estimating the sealants or coatings you need for your next project? Navigate to our Coating, Sealant, and Air Barrier Calculator and never be caught short again.

For estimating on the go, download the Pecora Corporation Sealants and Coatings Calculator app to your mobile device and have instant results right at your fingertips. Use the My Project tab to easily save calculations for new jobs or review past projects and send your job data via email, text message, or other preferred apps.

Visit us at pecora.com to see what resources Pecora offers to keep your projects up-to-date and on the cutting edge.

YOUR BLUEPRINT TO GREEN

Allow Pecora to ensure your building structure is energy efficient throughout its life-cycle. Our products help satisfy requirements of sustainable rating systems including LEED, Green Globes, and Living Building Challenge. Our innovations facilitate occupant comfort and minimize adverse health and environmental impacts.

Since 1862, Pecora has been committed to advancing the development of architectural weatherproofing products that protect buildings.

HOW IT WORKS

Pecora products close pathways through which air, moisture, and water can infiltrate and exfiltrate your building enclosure. Our sealants, air barriers, and traffic coatings contribute to optimized energy performance and indoor air quality. Weatherproofing your building's envelope using joint sealants and air barriers results in reduced energy use and lower energy costs as well as compliance with building and energy codes.

Using Pecora sealants indoors results in little to no off-gassing which, in turn, contributes to occupant well-being.

Compatibility with traditional building materials means that Pecora products are ideally suited for renovation and restoration projects that extend the life-cycle of existing buildings, conserve material resources, and reduce the waste and environmental impacts associated with demolition and reconstruction.

And Pecora's products provide building owners with the solutions they need to realize immediate and measurable operational benefits.
