W-VALLEY

Phillips EDGE*master*® W-Valley is used in the roof valley area to channel water down into the gutters. This product features a small ridge in the middle to prevent run-off rain from running down the side of the roof and running under the shingles on the opposing side. This product is available in 24" width (WV24) as shown; standard width of 18" (WV18) and 20" (WV20) also available. Available in a variety of colors (see color guide). This product features hemmed edges for easy installation. Standard packaging is 100 pieces per pallet.

WALL (DORMER) FLASHING

Phillips EDGE*master*® Wall (Dormer) Flashing is designed to prevent the entry of water into the wall. Wall flashing is typically found at interruptions in the wall, such as windows and points of structural support. This product works great to prevent top edge of window or door openings from water infiltration. Wall (Dormer) Flashing is available in open angle (WF120) and regular for 90° angles (WF90). Available in a variety of sizes and colors (see color guide). Packaging is 10 pieces per bundle.
