## PAPER BACK LATH

Asphalt saturated kraft building paper has been applied to the lath to control moisture, air flow and reduce air infiltration resulting in improved energy efficiency. Paper Back Lath is easy to install and ideal as a base for stone, ceramic tile and traditional stucco. The paper backing aids in plaster keying and stucco curing, protection of the sheathing during curing and forms the vertical surface behind the exterior wall cladding (stucco, brick, siding, etc.) that allows moisture to safely drain out of the wall system. The asphalt paper back breather sheet complies with Federal Specification UU-B-790A: Type 1, Grade D, Style 2 which is printed on the paper for easy identification. Paper Back is available with Flat Diamond Mesh Lath, Self-Furring Dimpled Diamond Mesh Lath and Self-Furring V-Groove Diamond Mesh Lath, Paper Backed Self Furring Diamond Mesh Lath and Paper Backed Flat Diamond Mesh Lath.

STRIP LATH

PART NUMBER: SEE TEXT

Phillips strip lath is a flat, expanded strip of metal lath strip used as plaster base and reinforcement in areas of solid bases and where uneven or dissimilar bases join. Typically attached diagonally at corners and windows, or other areas that are prone to cracking. This product is manufactured to specified weight with hot-dipped galvanized steel. Available in 6" (STL6HDG8) and 4" (STL4HDG8)
SIZES AND PACKAGING
STRIP LATH

Sheet Size	Pieces per Carton	Cartons per Pallet
4" x 97"	75	20
6" x 97"	75	20

UPC labeling available upon request

CORNERITE

Cornerite is designed for strengthening inside corners. This Phillips product is best for finishing inside corners prone to cracking thereby reducing call backs. Phillips Cornerite is run at 100° and locks in so it will form to the inside corner making a strong, straight, more durable corner. This product works great for reinforcing wall to ceiling corners and other inside corner areas on any stucco job noted for cracking. Available in 2"x2" (CR2HDG) and 3"x3" (CR3HDG)
