 Three Applications of Consolideck ${ }^{(8)}{ }^{\text {LS }}$ Guard ${ }^{\text {TM }}$ Chemical Resistance Testing Summary
## TEST METHODS: Stain Resistance - ASTM D 1308

The treatment was applied in accordance with PROSOCO, Inc. Product Data Sheet instructions and allowed to cure for 7 days prior to testing. The soiling agents were allowed to dwell on the treated and untreated substrates for times of 1 hour and 15 minutes. Evaluation consisted of a visual examination of the tested areas to determine the effect the reagent had on the sample using the following scale:

E = Excellent (No Adverse Effects)
G = Good (Limited Adverse Effects)
F = Fair (Moderate Adverse Effects)
P = Poor (Unsatisfactory)
