New Construction Cleaners

Done right, post-construction cleanup of a new brick, architectural block, or stone building reveals the true beauty of the masonry. It's the final touch that brings home all the hard work of the architect, specifier and contractor.

And yet post-construction cleanup of new masonry buildings is just a tiny fraction of the overall construction cost.

Done wrong, it can cost you more than you'd ever believe in time, money and reputation. Done wrong, your new building's appearance may be ruined beyond repair.

Excess mortar, mud and other job-site soiling has to come off the new building before it's ready for the client. PROSOCO's new construction cleaners help make sure it comes off quickly, easily and safely.

Every product PROSOCO manufactures in its state-of-the-art plant in Lawrence, Kan., is backed up by warranty,

safety information, toll-free telephone technical support and — if needed — free job-site visits from factory-trained field representatives.

PROSOCO wants you to succeed. When it's time to clean off the mortar and grout smears, oil, grease, dirt and other soiling, PROSOCO has the products, information and technical support you need to leave your project — and your reputation — looking sharp.

Brick, Tile and Stone

Sure Klean® and Stand Off® general-purpose cleaners for new brick, tile and stone dissolve mortar smears, grout, construction dirt and other common job-site staining. They leave masonry clean and uniform, with no acid burning or streaking. Specialty cleaners correct a variety of problems on improperly cleaned surfaces, including acid burn and vanadium staining.

Concrete Masonry

Sure Klean®, Paver Kare®, and Stand Off® products for new concrete construction get rid of excess mortar, job dirt, rust, efflorescence and more on smooth or textured architectural block, precast, cast-in-place, decorative and other concrete while improving color depth and uniformity. They'll also improve the bond of protective treatments and color coats for a longer service life.

Maintenance Cleaners

Expensive concrete, tile, paver and stone surfaces hold their value and beauty against the soil and stains of daily living with the help of PROSOCO's maintenance cleaners. Vertical or horizontal, indoors or out, help your clients enjoy the color of clean on all their concrete and masonry surfaces.

Concrete

Advanced Sure Klean® and Enviro Klean® technologies remove general soiling, oil stains, tar and tire marks, chewing gum, rust and more from horizontal concrete whether decorative or standard gray.

Tile, Paver and Natural Stone

Whether stains and soiling come by the day or the decade, Stand Off®, Paver Kare® and Enviro Klean® products provide the concentrated cleaning firepower to keep expensive surfaces sparkling.

Take it off like it was never there — PROSOCO's Defacer Eraser® graffiti removers help you and your clients defeat graffiti vandalism safely, quickly and easily.

Restoration Products

From the U.S. Capitol to Trinity Church in New York ... from Conversation Hall in Philadelphia to the Merchandise Mart in Chicago... leading historic preservation architects and state and federal agencies choose PROSOCO products for preserving historic buildings.

Restoration Cleaners

Specialized Sure Klean® formulations break up heavy accumulations of dirt, carbon, algae and oxidation on brick and terra cotta, as well as limestone, marble, sandstone, granite and other natural stone surfaces. Both interior and exterior cleaners and stain removers are available. Created for environmentally sensitive projects, Enviro Klean® products get the job done without harsh acids, caustics or solvents.

Consolidation Treatments

Conservare® products strengthen and weatherproof deteriorated historic masonry — preserving it for generations.

Paint-, Coating- and Graffiti-Removal Products

Sure Klean®, Enviro Klean® and Defacer Eraser® liquid, gel and paste products strip unwanted paint, graffiti, sealers and more from concrete, brick and stone.

The Industry Leader

Since 1954, PROSOCO products have been the number-one choice of thousands of conservators, architects, specifiers, contractors and engineers nationwide. Professionals recognize Sure Klean®, Enviro Klean®, Conservare® and other PROSOCO products as the most effective, reliable and proven products for restoration of aged and historic architecture.

Add the industry's best customer care and technical support and you have a specification for success every time.

Sure Klean® 766 Limestone & Masonry Prewash and Sure Klean® Heavy Duty Restoration Cleaner strip a coating of coal dust and urban grime nearly half an inch thick from this terra cotta skyscraper.

The Sprint Campus in Overland Park, Kan., shows the dramatic difference made by post-construction cleanup with Sure Klean® 600 Detergent, the nation's number-one selling proprietary cleaner for brick.
