

Application Tips

QC Cemseal

DO:

- ◆ For best results for medium to high traffic interior retail floors, apply a floor sealer such as QC Interior Floor Seal after applying QC Cemseal, then maintain using a high-speed buffing system.
- ◆ If applying a topcoat other than a QC floor sealer, test in an inconspicuous area for compatibility prior to use.

DON'T:

- ◆ Do not allow QC Cemseal to puddle; it is better to apply two thin coats than one heavy coat.
- ◆ Inadequate coverage will dramatically reduce the performance of QC Cemseal.
- ◆ Failure to keep the floor reasonably clean by sweeping, vacuuming or wet cleaning will result in premature wear and will not protect the concrete.
