WHY CHOOSE IMPRINT TECHNOLOGIES?

Imprint Technologies produces premium imprinting tools, seamless texturing mats and accessories. These products were created by BGI, the global leader in imprinted concrete paving with more than 50 years of history and a combined industry experience exceeding hundreds of years.

Our global network of manufacturing and distribution facilities are located in the United States, Spain, Britain, Mexico, Argentina, Philippines, Saudi Arabia and China, and each tool is produced within stringent quality control standards. You are assured consistent, durable imprinting tools at competitive prices with superior service and support, no matter where in the world you are located.

The Imprint Technologies quality line of imprinting tools, seamless texturing mats and accessories are available through your local distributor, listed on the back of this catalog.

Why Choose Imprint Technologies?

- Premium Quality
- Competitive Prices
- Superior Service
- Diverse Selection
- Global Availability
- Broad U.S. Distribution

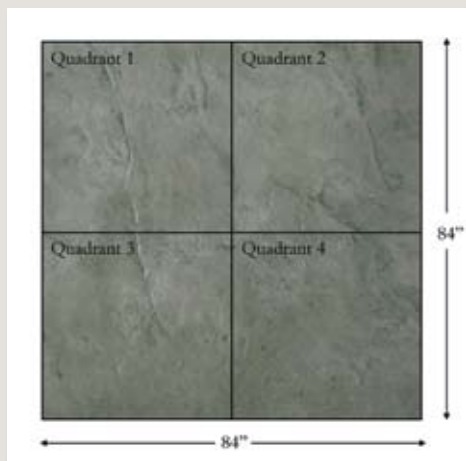

Additional Patterns and Textures are Available

As our global network is constantly adding new imprint tools and seamless texture mats to the Imprint Technologies offering, there are patterns and textures available that may not be reflected in this catalog. Please consult with your local Imprint Technologies Distributor if there is a particular pattern or texture you desire that you don't see here. Imprint Technologies is capable of producing any custom pattern, border or texture needed, leaving you with an endless palette of options and possibilities to choose from.

IMPRINT TECHNOLOGIES SEAMLESS TEXTURE MATS

are designed to imprint an exacting texture of natural stone or slate onto concrete surfaces. Cast from natural materials with a range of textures, Imprint Technologies Seamless Texture Mat System provides more variation in texture than competitive products.

Imprint Technologies innovative large master texture molds allow for the discriminating contractor to request seamless texture mats from differing areas of the mold. With this system a contractor may select to install texture all from one portion or from a "Quadrant" of the mold for more uniform texture. Contractors may also choose to imprint with all four quadrants which provides an exceptional range of texture variation, allowing more diversity in your finished product. All Imprint Technologies Seamless Texture Mats are numbered with the corresponding quadrant for ease of reference when ordering.

7' x 7' Master Mold

- High Density Polyurethane
- Innovative "Quadrant" Design
- Highly Durable; Resilient
- Less Fatiguing
- Realistic Textures

Made from high density polyurethane, Imprint Technologies Seamless Texture Mats have the perfect combination in stiffness and thickness which results in a stronger, lighter product. Less fatiguing, more durable and the best texture variation in the industry—all benefits of the Imprint Technologies Seamless Texture Mat System.

All standard Imprint Technologies Imprint Tools have comparable texture to the seamless texture mats so that touch ups and wall lines can be done with perfect transition. For areas requiring a supple mat the seamless texture mats are available in an Ultra Flexible Texture Mat. This softer yet resilient material has the same realistic texture but conforms to virtually any shape such as a stair tread or riser.

Imprint Technologies Seamless Texture Mats are available in a wide range of standard sizes with customs available upon request. Companion textures can be ordered in standard 24" x 24" without handles and 36" x 36" sizes with two handles while the primary textures are also available in 48" x 48" and 60" x 60" with 4 handles. Custom tools are available in a 72" x 72" size up to an incredible industry leading 84" x 84". Ultra Flexible Texture Mats contain no handles and come in a standard 24" x 24" size for all textures.

Colors are approximate, photography can change colors. We recommend samples and mock ups prior to installation to assure proper color selection.

Additional patterns and textures are available. Imprint Technologies offers custom pattern and texture designs to fit your needs. Please consult with your local Imprint Technologies Distributor for additional information on specialty patterns.

IT STENCILS

The look of brick, stone, or tile, can be created without having to stamp concrete. IT Stencils are easy to install and provide the three dimensional look and feel of brick, stone, and tile, with the strength and durability of concrete. Used in conjunction with Integral color systems, color hardeners, or overlay systems, a wide range of patterns, colors and textures can be achieved. IT Stencils are a great choice for patios, driveways, walkways, and commercial spaces.
